

**TORO AREA PLAN
SUPPLEMENTAL POLICIES**

1.0 - Land Use

- T-1.1 Development proposals on Corral de Tierra Road from “Four Corners” to Corral del Cielo shall complete safety improvements concurrently with development.
- T-1.2 Industrial land uses other than utilities shall not be permitted in the Toro area.
- T-1.3 The designated agricultural lands as shown on the Toro Area Plan Land Use Map (*Figure LU10*) shall be conserved and, where feasible, expanded.
- T-1.4 Special Treatment Area: Greco - The Greco property on River Road across from the Indian Springs Ranch Subdivision shall be designated as a "special treatment" area to be zoned Heavy Commercial. Although the use of the property for the removal of sand and gravel ceased in the year 2000, use of the property for a contractor’s yard, shop, and residence may continue pursuant to PLN980448 as approved August 29, 2001 or as that permit may be amended or extended. (APN: 139-021-005-000)
- T-1.5 Subdivision shall be designed so that new lots have building sites located outside of the critical viewshed.
- T-1.6 Existing legal lots of record located in the critical viewshed may transfer density from the acreage within the critical viewshed to other contiguous portions of land under the same ownership, provided the resulting development meets all other Toro Area and General Plan policies.
- T-1.7 Development on properties with residential land use designations located within the Toro Area Plan along the Highway 68 corridor shall be limited to the first single family home on a legal lot of record. The County shall conduct a comprehensive review of infrastructure constraints regarding circulation, wastewater, and water supply. Said restriction shall not apply to development within adopted Community Areas, Rural Centers, or Affordable Housing Overlays.

2.0 - Circulation

- T-2.1 Employers in surrounding areas should be encouraged to stagger employees' work hours in order to ease peak hour traffic congestion on Highway 68 and in other areas.
- T-2.2 Davis and Reservation Roads shall be encouraged as alternate routes between the Monterey Peninsula and Salinas to alleviate traffic on Highway 68.

- T-2.3 Continue to work with the state, local agencies, and citizens groups to alleviate traffic congestion while maintaining the scenic beauty of Highway 68. With the goal of eventually constructing a scenic four-lane divided highway, the County shall support the following measures:
- a. coordination with Caltrans and TAMC for the construction of a four-lane facility between the Toro interchange and State Route 218; and
 - b. construction of bus stops, pull-outs, and shelters where needed.
- T-2.4 Improvement of Highway 68 intersections, construction of alternate passing lanes, public transit roadway improvements, and improved bicycle safety measures should be undertaken at the earliest time that funding becomes available.
- T-2.5 Fairshare financial contributions from each new development in the Toro Planning Area shall be required to expedite funding and construction of Highway 68 improvements.
- T-2.6 Improvements to Corral de Tierra, River and San Benancio Roads shall be designed to accommodate bicycles, horses, and people where possible.
- T-2.7 To minimize traffic safety hazards, creation of new direct access points should be prohibited from single-family residences onto Highway 68 and discouraged onto Laureles Grade, River Road, Corral de Tierra Road, and San Benancio Road.
- T-2.8 To enhance and promote sensitive visual resources, the County shall pursue measures to obtain official County Scenic Route designation from the state for Corral de Tierra, San Benancio, Corral del Cielo, River, and Underwood Roads (see *Policy T-3.1*).
- T-2.9 If new sites for office, employment, services, and local conveniences are found to be appropriate, such sites should incorporate designs to allow use of alternate modes of transportation.
- T-2.10 Increasing the accessibility of Toro residents to mass transit, either through maintenance of existing park and ride lots or new bus service, particularly in the Corral de Tierra, San Benancio, and River Road areas should be studied and implemented.

3.0 - Conservation/Open Space

- T-3.1 Within areas designated as “visually sensitive” on the Toro Scenic Highway Corridor and Visual Sensitivity Map (*Figure 16, next page*), landscaping or new development may be permitted if the development is located and designed (building design, exterior lighting and siting) in such a manner that will enhance the scenic value of the area. Architectural design consistent with the rural nature of the Plan area shall be encouraged.

(8.5" x 11")

- T-3.2 Land use, architectural, and landscaping controls shall be applied and sensitive site design encouraged to preserve Toro's visually sensitive areas and scenic entrances:
- a. River Road/Highway 68 intersection; and
 - b. Laureles Grade scenic vista overlooking the Planning Area.
- T-3.3 Portions of County and State designated scenic routes shall be designated as critical viewshed as shown on the Toro Visual Sensitivity Map. Except for driveways, pedestrian walkways and paths, a 100-foot building setback shall be required on all lots adjacent to these routes to provide open space and landscape buffers. This setback may be reduced for existing lots of record that have no developable area outside the setback and to accommodate additions to existing structures that become non-conforming due to this policy. New development shall dedicate open space easements over set back areas established by this policy.
- T-3.4 Placement of existing utility lines underground shall be encouraged, particularly along Laureles Grade Road, Corral de Tierra, San Benancio, River Road, and Highway 68.
- T-3.5 Exterior/Outdoor lighting shall be located, designed and enforced to minimize light sources and preserve the quality of darkness. Street lighting shall be as unobtrusive as practicable and shall be consistent in intensity throughout the Toro area.
- T-3.6 Large acreages in higher elevations and on steeper slopes shall be preserved and enhanced for grazing, where grazing is found to be a viable use.
- T-3.7 The preservation of oak trees within Toro Area Plan shall be promoted by discouraging removal of healthy trees with diameters in excess of 6-inches d.b.h.

4.0 - Safety

- T-4.1 Land uses and practices that may contribute to significant increases of siltation, erosion, and flooding in the Toro area shall be prohibited.

5.0 - Public Services

- T-5.1 To ensure cost-effective and adequate levels of wastewater treatment, the County shall promote relatively higher densities in areas where wastewater treatment facilities can be made available.

6.0 - Agriculture

No supplemental Agricultural policies at this time.
