AMBAG Energy Watch is a partnership between The Association of Monterey Bay Area Governments (AMBAG) and Pacific Gas and Electric Company (PG&E) that assists small and medium agriculture businesses throughout Monterey, San Benito and Santa Cruz Counties. Our team is here to help agricultural businesses save money and reduce energy use by providing valuable energy efficiency assistance.

The turnkey energy efficiency program includes a no-cost energy assessment of your facilities. The assessment is reviewed with your team and you are able to select from the recommendations which energy efficiency measures you would like to implement. If you choose to proceed with installation, our program provides a streamlined process of quality-assured product installation.

The funding provided through the AMBAG Energy Watch program makes it possible to reduce the costs related to the installation of energy efficiency measures. Possible measures include: energy efficient lighting equipment, occupancy sensors for lighting, refrigeration equipment, vending machine controllers, and heating/air conditioning equipment. Funding is limited and available to eligible customers on a first-come, first-served basis.
