Sample Pest Management Plan

Any Vectors (mice, rats, rodents, flies or other pest) will be controlled through:

1. Preventing accumulation of garbage
2. Keeping compost piles covered or contained
3. Keeping lids on all solid waste containers
4. Solid waste containers shall be maintained
5. Preventing mosquitoes harborage/generation by eliminating standing water from accumulating in buckets, tires, or ponding
6. Keeping animal feed in secure containers
7. Weekly maintenance of property
8. If necessary and determined through inspections of an infestation, a contract for Professional Pest Management Services.

The information used in this sample document can be used by the applicant. Additional measures can be added to this list to describe the applicant's actions to control pest (vectors) at the Rooster Keeping Operation.
