NOTES:

- AADT figures for state highways were obtained from CALTRANS TRAFFIC WEBSITE at <http://www.dot.ca.gov/trafficops/census/>.
- Segment lengths are in miles.
- Due to farming operations, traffic counts vary significantly between winter and other seasons.
- The disparity in directional volumes on segments referred to this note are traffic trends (not bad counts) as historical data shows.
- AADT values for Control Stations (CS), Carmel Valley Road (CVR) permanent count stations (LOOPS), and Carmel Valley Master Plan segments (CVMP) are actual field data averages (NOT FACTORED by CS FACTORS). Count system is as follows:
 CVR LOOPS (L) - Counted 365 days; using TUE, WED, and THUR 24 - hr data.
 CONTROL STATIONS (CS) - Counted monthly for one full week; using weekday 24 - hr data.
 CARMEL VALLEY MASTER PLAN segments (CVMP) - Counted in JUN and OCT for one week; using TUE, WED, THUR 24 hour data only.
