Special Release Notification:

Maintenance activities are occurring at Nacimiento Dam during the week of July 16th. In order to ensure safe completion of these activities, Nacimiento reservoir releases have been reduced significantly. During this time, additional water will be released from San Antonio Reservoir to maintain Salinas River flows and continued operation of the Salinas River Diversion Facility (SRDF).

Currently, the MCWRA is making conservation releases for groundwater recharge and SRDF operations. For details related to NMFS flow requirements in the Salinas River see:
