Instructions For Completing CERS
Consolidated Emergency Response/Contingency Plan

Introduction

Health and Safety Code (HSC) §25504(b) requires that Hazardous Materials Business Plans (HMBP) contain Emergency Response Plans and Procedures in the event of a reportable release or threatened release of a hazardous material. HSC §25504(c) requires that HMBPs address training of employees in safety procedures in the event of a reportable or threatened release.

Title 22 California Code of Regulations (22 CCR) §66262.34(a) requires facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, prepare a Contingency Plan. Facilities that generate in any month more than 1 kilogram of acutely hazardous waste (AHW), or more than 100 kilograms of debris resulting from the spill of an AHW, or which treat hazardous waste onsite under the Permit by Rule (PBR) onsite treatment tier must also prepare a Contingency Plan.

The California Environmental Reporting System (CERS) Consolidated Emergency Response/Contingency Plan has been prepared to: unify emergency response and contingency plan requirements for hazardous materials and hazardous wastes; provide for basic contingency planning for an average small to mid-size facility; and incorporate minimal regulatory requirements. Other supplements or amendments may be required for facilities of exceptional size or having exceptional operations or processes that warrant additional contingency planning. The CERS format is not mandatory. You may instead substitute another emergency planning document [e.g., Spill Prevention Control and Countermeasure (SPCC) Plan], provided that it satisfies the HSC and 22 CCR requirements for content.

General Instructions

- This plan applies to both your non-waste hazardous materials and hazardous waste — keep both in mind as you address each plan section.
- Mark sections that don’t apply to your facility with “N/A” for not applicable.
- Be as specific as possible.
- Facilities with unusual employee turnover (e.g., gas stations) may substitute position titles for specific employee names when identifying emergency coordinators or emergency response team members to avoid having to constantly revise the plan due to personnel turnover.
- Review the specific line item instructions before completing your plan to avoid common errors.
- After it is completed and signed/certified, the plan or its equivalent should be scanned and uploaded to CERS as a PDF-format document. Your HMBP will not be complete until it includes this information.
