AREAS OF CONCERN (e.g. traffic, neighborhood compatibility, visual impact, etc.):

Smith: There will be a 60' wide road easement containing the utilities. This was clarified by applicant.

- The LWAC was not provided the Scenic Easement diagram. So we don't know how to evaluate this topic per property.

- The suggested building sites really depend on the access ~~to~~ between Scenic Easement Parcel #1 and #2.

- The ^{natural} drainage now existing south of the proposed road accessing parcel #3 needs to be retained and protected in building the new access road.

RECOMMENDED CHANGES/CONDITIONS (e.g. reduce scale, relocate on property, reduce lighting, etc.):

Smith: Flesh out the scenic easements and be sensitive to the drainage.

Church: - Make sure the proposed buildings are located adjacent to the access road for parcel #1, #2 and #3 on the north side of the parcels. The screening may be removed for road construction or infection of the trees/dying back. If this happens there will be no screen and proposed sites are in full view of Highway 68.

- Parcel #1 and #2: the proposed house envelope should be moved back (north) into the valley because you can see Highway 68 ^{in a blur} as the story poles are situated.

The screening disappears as you drive on Highway 68 and look at the pasture land.
