Conservation and Scenic Easement Deed (Coastal) PLN080046
Exhibit A: Legal Description
Exhibit B: Adopted Mitigated Negative Declaration & Resolution of Intent for December 8, 2011 Zoning Administrator Hearing
Exhibit C: Existing Conservation and Scenic Easement Deed for PC-6251 (Parcel D)
Exhibit D: Conservation and Scenic Easement Map and Metes and Bounds Description

Sandra Gaye Hartnett, Trustee of the Stephen Paul Hartnett Trust, u/t/a dated November 3, 2011 (Grantor)
AMENDED CONSERVATION AND SCENIC EASEMENT DEED (COASTAL)

This Amendment to the Conservation and Scenic Easement (hereinafter "Amendment") is made and entered into this 24th day of January, 2012 by and between Sandra Gaye Hartnett, Trustee of the Stephen Paul Hartnett Trust, u/t/a dated November 3, 2011, as Grantor, and the County of Monterey, a political subdivision of the State of California as Grantee.

WITNESSETH:

WHEREAS, said Grantor is the owner in fee of the real property more particularly described in Exhibit "A" attached hereto and incorporated herein by reference (hereinafter the “Property”), situated in Monterey County, California in the Carmel Area Use Plan Area; and

WHEREAS, Grantor’s predecessor in interest Highland Partners, a Hawaii limited partnership, granted a Scenic and Conservation Easement recorded June 13, 1990, at Reel 2520, Page 335, Official Records of Monterey County, attached hereto as Exhibit C and incorporated herein by this reference.
WHEREAS, Grantor applied for a Combined Development Permit (PLN0080046) for development of Property;

WHEREAS, a resolution of Intent to approve the Combined Development Permit was adopted on December 8, 2011 by the Zoning Administrator pursuant to the Findings and Evidence contained in Resolution 11-053, attached hereto as Exhibit B and incorporated herein by this reference;

WHEREAS, as a condition of approval of the Combined Development Permit, the County required the Grantor to revise the scenic easement area to put into Conservation and Scenic Easement all portions of the property except where the revised building slope exists (Condition #33);

WHEREAS, the revised boundaries of the conservation and scenic easement are depicted, along with the metes and bounds description, on Exhibit D, attached hereto and incorporated herein by this reference,

WHEREAS, in fulfillment of the aforesaid condition, Grantor desires to enter into this Amendment to the Conservation and Scenic Easement Deed with Grantee to comply with said condition, and

WHEREAS, Grantor and Grantee intend that this Amendment shall amend the Conservation and Scenic Easement Deed insofar as the location of the easement on the Property, with all other terms to remain in effect.

NOW, THEREFORE, Grantor and Grantee agree as follows:

1. The boundaries and description of the Amended Conservation and Scenic Easement Deed as depicted and described on Exhibit D shall replace the Conservation and Scenic Easement Deed as recorded previously, and as shown on Exhibit C.

2. All other terms and conditions of the original Conservation and Scenic Easement Deed shall remain in full force and effect and are incorporated herein by this reference.

3. This amended Conservation and Scenic Easement Deed shall run with the land and burden the property, and all obligations, terms, conditions, and restrictions hereby imposed shall be deemed to be covenants and restrictions running with the land and shall be effective limitations on the use of the property from the date of recordation of this document and shall bind the Grantor and all of its
successors and assigns. This grant shall benefit the County of Monterey and its successors and assigns forever.

4. Any act or any conveyance, contract, or authorization whether written or oral by the Grantor which uses or would cause to be used or would permit use of the property contrary to the terms of this offer will be deemed a breach hereof. The Grantee may bring any action in court necessary to enforce this grant of easement, including, but not limited to, injunction to terminate a breaching activity and to force the restoration of all damage done by such activity, or an action to enforce the terms and provisions hereof by specific performance. It is understood and agreed that the Grantee may pursue any appropriate legal and equitable remedies. The Grantee shall have sole discretion to determine under what circumstances an action to enforce the terms and conditions of this grant of easement shall be brought in law or in equity. Any forbearance on the part of the Grantee to enforce the terms and provisions hereof in the event of a breach shall not be deemed a waiver of Grantee's rights regarding any subsequent breach.

5. The Grantee shall not be obligated to maintain, improve, or otherwise expend any funds in connection with the property or any interest or easement created by this grant of easement. All costs and expenses for such maintenance, improvement use, or possession shall be borne by the Grantor, except for costs incurred by Grantee for monitoring compliance with the terms of this easement.

6. This conveyance is made and accepted upon the express condition that the Grantee, its agencies, departments, officers, agents, and employees are to be free from all liability and claim for damage by reason of any injury to any person or persons, including Grantor, or property of any kind whatsoever and to whomsoever belonging, including Grantor, from any cause or causes whatsoever, except matters arising out of the sole negligence of the Grantee, while in, upon, or in any way connected with the property, Grantor hereby covenanting and agreeing to indemnify and hold harmless the Grantee, its agencies, departments, officers, agents, and employees from all liability, loss, cost, and obligations on account of or arising out of such injuries or losses however occurring. The Grantee shall have no right of control over, nor duties
and responsibilities with respect to the property which would subject the Grantee to any liability occurring upon the land by virtue of the fact that the right of the Grantee to enter the land is strictly limited to preventing uses inconsistent with the interest granted, the property is not "property of a public entity" or "public property," and Grantee's rights herein do not include the right to enter the land for the purposes of correcting any "dangerous condition" as those terms are defined by California Government Code Section 830.

7. The terms, covenants, conditions, exceptions, obligations, and reservations contained in this conveyance shall be binding upon and inure to the benefit of the successors and assigns of both the Grantor and the Grantee, whether voluntary or involuntary.

8. If any provision of this conservation and scenic easement is held to be invalid or for any reason becomes unenforceable, no other provision shall be thereby affected or impaired.

Executed this 12th day of January 2012, at Colleyville, Texas.

Signed: Sandra Gaye Hartnett, Trustee of the Stephen Paul Hartnett Trust, u/t/a dated November 3, 2011 as GRANTOR

TEXAS

EXHIBIT "A"

The land referred to is situated in the State of California, County of Monterey, in the unincorporated area, and is described as follows:

PARCEL I:

Certain real property situated in the County of Monterey, State of California, being a portion of Section 25 in Township 16 South, Range 1 West, M.D.B., said portion being particularly described as follows:

Beginning at the southwesterly corner of the parcel of land designated "75.56 AC." on that certain Record of Survey Map filed for record on December 4, 1979 in the Office of the County Recorder of said County of Monterey, in Volume 12 of Surveys at Page 87;

(1) N. 10' 09" E., along the westerly boundary of said parcel (at 400.00 feet across the centerline of the Road and Utilities Right of Way 60 feet wide hereinafter identified, at 650.85 feet a chiseled "X" on a rock, at 829.52 feet a 6" x 6" sandstone monument marking the northeast corner of the "25.42 AC." parcel shown on said map, at 1312.79 feet the northwest corner of said 75.56 acre parcel and southwest corner of the "15.05 AC." parcel shown on said map and thence along the west boundary of said 15.05 AC parcel, a total distance of 1969.29 feet to the northwest corner of said 19.05 acre parcel; thence

(2) N. 55' 17" E., along the northerly boundary of said parcel, 1270.98 feet to the northeast corner thereof; thence

(3) S. 53' 47" W., along east boundary of said parcel, 653.80 feet, to the southeast corner thereof, on the north boundary of said 75.56 acre parcel; thence

(4) S. 4' 06" W., along said north boundary, 629.14 feet, to the northwest corner of the northeast quarter of the southwest quarter of the southeast quarter of said Section 25; thence, leaving the boundary of said 75.56 acre parcel and following the boundary of said northeast quarter of the southwest quarter of the southeast quarter

(5) S. 1' 08" W., 652.75 feet; thence

(6) N. 42' 17" E., 625.53 feet to the east boundary of said 75.56 acre parcel; thence

(7) E. 22' 20" W., 651.81 feet to the southeast corner of said parcel; thence

(8) S. 35' 46" W., along south boundary of said parcel (at 1245.84 feet the northeast corner of the 74.59 acre parcel shown on said map, at 1741.55 feet, a 1" iron pipe with plastic cap stamped "RCE 15310" at 1792.98 feet the centerline of said Road and Utilities Right of Way, at 1826.15 feet, a 1" iron pipe with plastic cap stamped "RCE 15310", a total distance of 2525.98 feet, to the point of beginning.

Said parcel also depicted as Parcel "D" on Map filed April 5, 1990 in Volume 16, Page 59 of Surveys.

Exhibit "A"
348418v2/37043.1
Excepting therefrom a 1/16th interest of all coal, oil, gas and other mineral deposits, as set forth in the Deed from The State of California to J. P. Ravendorf, recorded August 4, 1924 in Volume 44 of Official Records, Records of Monterey County, at Page 19.

PARCEL II:

Non-exclusive easements for roadway purposes, more particularly described as follows:

That certain road right of way (15 feet wide) reserved in deed from Carmel Development Company to Margaret H. Kilpatrick, recorded 30 January 1928 in Volume 137 at Page 434, Official Records of Monterey County, California, the centerline of which is being described as follows:

Beginning at a point on the centerline of Corona Road (a county road), as said point is shown and designated on "W-6 + K-24" on that certain map entitled, "Map No. 3 of a part of Carmel Highlands Property Showing Survey Lines, A Part of Rancho San Jose Y Sur Chiquito, etc." a copy of which map was filed 2 May 1925 in Volume 3 of Surveys, at Page 105, Records of Monterey County, California, thence along the K-Survey Line, as shown on said map

(1) S. 80' 47" E., 251.48 feet to K-25; thence
(2) N. 36' 13" 30" E., 264.82 feet to K-26; thence
(3) N. 54' 02" 30" E., 280.42 feet to K-27; thence
(4) N. 86' 01" E., 46.14 feet to K-28; thence
(5) S. 14' 47" 30" E., 284.13 feet to K-29 - S-0; thence
(6) S. 3' 54" 30" W., 120.9 feet to K-30; thence
(7) S. 21' 03" 30" E., 79.06 feet to K-31; thence
(8) S. 67' 47" E., (as per said deed, shown as S. 67' 47" 30" E., in said map), 115.43 feet to K-32; thence
(9) S. 43' 16" 30" E., 166.15 feet to K-33; thence
(10) S. 74' 11" E., 104.76 feet to K-34; thence
(11) S. 52' 37" 30" E., 94.58 feet to K-35; thence
(12) S. 82' 25" 30" E., 146.25 feet to K-36; thence
(13) S. 29' 50" 30" W., 145.56 feet to K-37; thence
(14) S. 11' 39" W., 74.15 feet to K-38; thence
(15) S. 27' 36" 30" E., 53.11 feet to K-39.

PARCEL III:

That certain non-exclusive road right of way (40 feet wide) reserved in deed from
Carmel Development Company to Margaret H. Kilpatrick, recorded 30 January 1928 in Volume 139 at Page 281, Official Records of Monterey County, California, the centerline of which is being described as follows:

Beginning at a point designated as "K-39" and being a point of K-Survey Line, as said point and line are shown on that certain map entitled, "Map No. 3 of a part of Carmel Highlands property showing Survey Lines, A part of Rancho San Jose Y Sur Chiquito, etc." a copy of which map was filed 2 May 1925 in Volume 3 of Surveys at Page 103, Records of Monterey County, California; thence along said survey line

(1) N. 63° 08' E., 20.81 feet to K-40; thence
(2) N. 2° 07' E., 86.09 feet to K-41; thence
(3) N. 46° 21' E., 90.13 feet to K-42; thence
(4) N. 57° 19' 30" E., 152.77 feet to K-43; thence
(5) N. 32° 30' E., 54.40 feet to K-44; thence
(6) N. 27° 41' 30" W., 136.15 feet to K-45; thence
(7) N. 50° 24' 30" E., 123.28 feet to K-46; thence
(8) N. 23° 40' W., 127.09 feet to K-47; thence leaving said survey line
(9) S. 78° 18' E., 204.05 feet; thence
(10) S. 53° 34' 30" E., 143.18 feet; thence
(11) S. 38° 45' E., 200.91 feet; thence
(12) S. 10° 33' E., 87.31 feet; thence
(13) S. 71° 47' 30" E., 47.19 feet; thence
(14) N. 2° 51' W., 145.13 feet; thence
(15) N. 50° 14' E., 43.48 feet; thence
(16) N. 89° 03' E., 152.91 feet; thence
(17) S. 58° 23' E., 137.78 feet.

PARCEL IV:

A non-exclusive right of way for road and utilities purposes over that certain portion of a strip of land 50 feet wide and shown as "Parcel A" on that certain Record of Survey Map filed 4 December 1978 in Volume 12 of Surveys at Page 87, Records of Monterey County, California, the centerline of which is being described as follows:

Beginning at a point shown and designated as Point "B" on said map; thence along Course Numbered (1) through (20), to a point shown and designated as Point "F" on said map.

Exhibit "A"
348418v2/37043.1 3
PARCEL V:

A non-exclusive right of way for utilities purposes over that portion of the Road and Utilities Right of Way 60 feet wide identified and described as "Parcel A" on the Record of Survey Map filed for record on December 4, 1979, in the Office of the County Recorder, State of California in Volume 12 of Surveys at Page 87, lying within the parcel designated "157.20 Ac." as shown on said Record of Survey Map, and running from Point "R" as designated on said map, along courses (34) through (57) of the centerline of said "Parcel A" and along the northerly 200 feet (arc distance) of course (58) of said centerline. As conveyed by R. Wesley Wright et ux to Highland Partners, A Hawaii Limited Partnership, by document recorded January 13, 1993 in Reel 2897, Page 594, Official Records.

NOTICE OF INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION
MONTEREY COUNTY ZONING ADMINISTRATOR

NOTICE IS HEREBY GIVEN that the Monterey County Resource Management Agency – Planning Department has prepared a draft Mitigated Negative Declaration, pursuant to the requirements of CEQA, for a Combined Development Permit (Hartnett, File Number PLN080046) at 164 Corona Road, Carmel (APN 241-221-011-000) (see description below). The Mitigated Negative Declaration and Initial Study, as well as referenced documents, are available for review at the Monterey County Resource Management Agency – Planning Department, 168 West Alisal, 2nd Floor, Salinas, California. The Zoning Administrator will consider this proposal at a meeting on August 25, 2011 at 1:30 p.m. in the Monterey County Board of Supervisors Chambers, 168 West Alisal, 2nd Floor, Salinas, California. Written comments on this Negative Declaration will be accepted from July 8, 2011 to August 8, 2011. Comments can also be made during the public hearing.

Project Description: Combined Development Permit consisting of: 1) Coastal Administrative Permit to allow the construction of a 6,058 square foot single family dwelling with attached 1,167 square foot garage; 2) Coastal Development Permit to allow a 990 square foot Caretaker’s Unit with 449 square foot garage; 3) a Coastal Development Permit to allow development within 100 feet of Environmentally Sensitive Habitat area (ESH); 4) a Coastal Administrative Permit to convert a test well into a production well; 5) A Coastal Development Permit to amend a Lot Line Adjustment map to relocate the building envelope at the site; and 6) Design Approval. The property is located at 164 Corona Road, Carmel (Assessor’s Parcel Number 241-221-011-000), Carmel Area Land Use Plan, Coastal Zone.

We welcome your comments during the 30-day public review period. You may submit your comments in hard copy to the name and address above. The Department also accepts comments via e-mail or facsimile but requests that you follow these instructions to ensure that the Department has received your comments. To submit your comments by e-mail, please send a complete document including all attachments to:

CEOACOMMENTS@CO.MONTEREY.CA.US

An e-mailed document should contain the name of the person or entity submitting the comments and contact information such as phone number, mailing address and/or e-mail address and include any and all attachments referenced in the e-mail. To ensure a complete and accurate record, we request that you also provide a follow-up hard copy to the name and address listed above. If you do not wish to send a follow-up hard copy, then please send a second e-mail requesting confirmation of receipt of comments with enough information to confirm that the entire document was received. If you do not receive e-mail confirmation of receipt of comments, then please submit a hard copy of your comments to ensure inclusion in the environmental record or contact the Department to ensure the Department has received your comments.

Facsimile (fax) copies will be accepted with a cover page describing the extent (e.g. number of pages) being transmitted. A faxed document must contain a signature and all attachments referenced therein. Fax document should be sent to the contact noted above at (831) 757-9516. To ensure a complete and accurate
record, we request that you also provide a follow-up hard copy to the name and address listed above. If you do not wish to send a follow-up hard copy, then please contact the Department to confirm that the entire document was received.

For reviewing agencies: The Resource Management Agency – Planning Department requests that you review the enclosed materials and provide any appropriate comments related to your agency's area of responsibility. The space below may be used to indicate that your agency has no comments or to state brief comments. In compliance with Section 15097 of the CEQA Guidelines, please provide a draft mitigation monitoring or reporting program for mitigation measures proposed by your agency. This program should include specific performance objectives for mitigation measures identified (CEQA Section 21081.6(c)). Also inform this Department if a fee needs to be collected in order to fund the mitigation monitoring or reporting by your agency and how that language should be incorporated into the mitigation measure.

All written comments on the Initial Study should be addressed to:

II. DESCRIPTION OF PROJECT AND ENVIRONMENTAL SETTING

A. Description of Project: The proposed project entails relocating a building envelope by amending a record of survey found in Volume 16 Page 99 of the Monterey County Records. The Record of Survey was filed pursuant to Monterey County permit number PC-6251. PC-6251 required establishment of building envelopes for four (4) parcels located off of Corona Road including the subject property (Parcel D) and granting of a conservation and scenic easement over the land outside of the building envelope. The Conservation and Scenic Easement Deed recorded at the Monterey County Recorder’s Office, document number 35437 located at Reel 2520 page 335 will also be amended to except the new building envelope location and include the area where the previous envelope was located (Source IX. 1).

The project would also consist of construction of a new 6,058 square foot, two-story single family dwelling with a 1,167 square foot attached garage with a 449 square foot carport in front of the garage, a new 990 square foot detached caretaker’s unit with garage, 4,837 square feet of impervious area for a driveway, patio, and walkways, installation of two 5,000 gallon water tanks, installation of a new septic tank and leach fields, and approximately 2,800 cubic yards of grading (2,700 cut/100 fill) to accommodate the new structures proposed on the relocated building envelope. The excess fill material will be exported to a location permitted to receive soil materials. Twenty (20) Monterey Pine trees ranging in size from 4 to 6 inches in diameter will be removed for the proposed development and approximately 12,000 square feet of Coastal Scrub habitat including Hooker’s Manzinita will be affected. Hooker’s Manzinita is 1B.2 species of concern for the Department of Fish & Game (hereafter referred to as DFG).

A permitted test well is located across Corona Road from the proposed development in the area of the existing building envelope. The project also involves conversion of a test well to a production well (Source IX. 1 & 14)

B. Surrounding Land Uses and Environmental Setting: The subject parcel is located in the Coastal Mountain range known as the Diablo Mountains above the Carmel Highlands, east of Point Lobos State Park. The site is over 84 acres spanning a southeast to northwest trending ridge top between Gibson Creek to the north and Wildcat Creek to the south. The site is steep and densely covered with chaparral. The site can only be accessed from Highway 1 through the Carmel Highlands on either Corona Road or Mount Devon Road. Both roads become decomposed granite surface that meander through the rough terrain with sharp switch-backs. The existing building envelope at the site is located just south of Corona Road and is approximately 0.61 acres in size. The new building envelope is proposed just north of Corona Road and would contain the same amount of area. Vegetation within the proposed building envelope includes a mixture of small pine trees and dense chaparral. Adjacent to the proposed building envelope is a stand of redwood trees.

Zoning for the property is Watershed and Scenic Conservation in the Coastal Zone (WSC (CZ)). The area is mostly mountainous with large parcel sizes and mostly undeveloped spaces which provide good habitat for native wildlife and vegetation. It also lends itself to high fire hazards, especially during hot, dry periods. Loose top soils in the area, combined with steep slopes,
require strict adherence to erosion control measures to prevent soils runoff and erosion at the site (Source IX. 1, 5, 7, & 10). The site will be served by electric power by an existing underground PG&E service. Water comes from a test well installed and inspected under a previous permit (PLN070033) that will be converted to a permanent well as part of the proposed project. Sewage disposal will be through a proposed new septic system.

C. Other public agencies whose approval is required: Approval of a small water system permit through the Monterey County Environmental Health Division is required to serve the proposed house and caretaker unit. Construction Permits will be required by the Resource Management Agency — Building Department prior to development. In addition, this study analyzes the effect of the proposed actions including Coastal Development Permits to allow vegetation removal and development. Coastal Development Permits are subject to review and appeal authority by the California Coastal Commission.

These described permits do not absolve the owner or other person or entity from obtaining any other permits that may be required by law. For instance, if State listed species are found at the site, consultation with the DFG is still required.

III. PROJECT CONSISTENCY WITH OTHER APPLICABLE LOCAL AND STATE PLANS AND MANDATED LAWS

Use the list below to indicate plans applicable to the project and verify their consistency or nonconsistency with project implementation.

| General Plan/Area Plan | Air Quality Mgmt. Plan | ☒ |
| Specific Plan | Airport Land Use Plans | ☐ |
| Water Quality Control Plan | Local Coastal Program-LUP | ☒ |

General Plan/Air Quality Management Plan / Local Coastal Program — LUP
The proposal was reviewed for consistency with the Carmel Land Use Plan and the Coastal Implementation Plan Parts 1 & 4. The property is located within the Watershed and Scenic Conservation land use designation, which allows 40-80 acres/unit. Policy areas not addressed by the Local Coastal Program cited above include Noise Hazards and the Air Quality Management Plan (AQMP). As such, the County considers consistency with 1982 General Plan noise policies and the AQMP policies for projects in the Coastal Zone. The project is consistent with the 1982 General Plan noise policies, as explained below in Section IV.A.10. Discussion on consistency with the AQMP is contained in Section VI.3 below. Potential Impacts based on LUP policies, were identified but all impacts can be avoided or mitigated to a level of insignificance.

Staff has conducted site visits and reviewed the project and technical documents prepared for the project. The project includes construction of a new house and caretaker unit on an 84 acre site. Environmental impact avoidance and minimization measures will be applied as necessary.
Findings of consistency the Monterey County Local Coastal Program will be required prior to approval of the project by the appropriate authority.

**IV. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED AND DETERMINATION**

**A. FACTORS**

The environmental factors checked below would be potentially affected by this project, as discussed within the checklist on the following pages.

<table>
<thead>
<tr>
<th>☑ Aesthetics</th>
<th>☐ Agriculture and Forest Resources</th>
<th>☑ Air Quality</th>
</tr>
</thead>
<tbody>
<tr>
<td>☑ Biological Resources</td>

<td>☐ Recreation</td>
</tr>
<tr>
<td>☐ Transportation/Traffic</td>
<td>☐ Utilities/Service Systems</td>
<td>☑ Mandatory Findings of Significance</td>
</tr>
</tbody>
</table>

Some proposed applications that are not exempt from CEQA review may have little or no potential for adverse environmental impact related to most of the topics in the Environmental Checklist; and/or potential impacts may involve only a few limited subject areas. These types of projects are generally minor in scope, located in a non-sensitive environment, and are easily identifiable and without public controversy. For the environmental issue areas where there is no potential for significant environmental impact (and not checked above), the following finding can be made using the project description, environmental setting, or other information as supporting evidence.

☐ Check here if this finding is not applicable

**FINDING:** For the above referenced topics that are not checked off, there is no potential for significant environmental impact to occur from either construction, operation or maintenance of the proposed project and no further discussion in the Environmental Checklist is necessary.

**EVIDENCE:** Many of the above topics on the checklist do not apply. Less than significant or potentially significant impacts are identified for aesthetics, air quality, greenhouse gases, biological resources, geologic and soils, hazards, hydrology and water
quality, and land use/planning. Mitigation measures are provided as warranted. 
The project will have no quantifiable adverse environmental effect on the 
categories not checked above, as follows:

1. **Agricultural and Forestry Resources**. The project site is not designated as Prime, Unique 
or Farmland of Statewide or Local Importance and project construction would not result 
in conversion of prime agricultural lands to non-agricultural uses. The site is not under a 
Williamson Act Contract. The project site is located within mountainous area with steep 
slopes and is not located adjacent to agriculturally designated lands. Therefore, the 
proposed project will have no impact to Agricultural Resources. (Source: IX. 3, 7, & 8)

2. **Cultural Resources** The project is located within an area mapped in the Carmel Land Use 
Plan as 'High' in archaeological sensitivity. An archaeological report was submitted for 
the proposed development prepared by Archaeological Consulting dated January 6, 2010, 
that did not reveal any potentially significant resources and concluded that the project 
should not be delayed for archaeological reasons. A standard condition of approval 
requiring work to be halted and the Planning Department and an archaeologist be 
notified, if, during the course of construction potentially significant archaeological 
resources are discovered. Therefore the proposed project will have no impact to Cultural 
Resources (Source: IX. 4 & 12).

3. **Hydrology and Water Quality** The project involves the conversion of an existing test well 
into a production well that will be the source of water for the proposed single family 
dwelling and caretaker unit. Because the well will serve two units, it is required to be 
permitted as a small water system pursuant to the requirements of the Monterey County 
Environmental Health Division (EH). EH has reviewed the water quality and quantity of 
the test well and has determined that the well has adequate water quality and capacity to 
serve the proposed development. The subject site is outside the “study area” of the 
Interim Emergency Ordinance prohibiting wells on lots of less than 2.5 acres in the 
California American Water Service area. The lot is also outside of the Carmel Highlands 
“on-site waste management plan” area. There are no wetlands or waterways on the 
property and the site is not near a flood plain. It is located on a ridge high above Carmel 
Highlands. Erosion control and drainage control measures will be implemented for the 
project (Source IX. 1 & 16). Therefore the proposed development will have no impact on 
Hydrology and Water Quality.

4. **Mineral Resources** No mineral resources have been identified or would be affected by this 
project (Source: IX. 3, 8, & 10). Therefore, the proposed project will have no impact to 
Mineral Resources.

5. **Noise** The construction of one single-family home within this area would not expose 
people to noise levels that exceed standards and would not substantially increase ambient 
noise levels. The project site is not located in the vicinity of an airport or private airstrip. 
The project is located in a remote area with large distances between dwellings. The Health 
Department has reviewed and recommended approval of the proposal, without conditions 
relating to noise. There is no evidence that the persons residing or working near the project 
site would be significantly impacted by noise or vibrations related to this project. 
Temporary construction activities will comply with the County's noise requirements, as
required in the County Code, Chapter 10.60. (Source: IX. 2 & 7). Therefore, the proposed project will have no impact to Noise.

6. Population/Housing The proposed project would not induce substantial population in the area, either directly through the construction of one single-family home and a caretaker unit within an area that allows single family homes as a principally permitted use and caretaker units as a conditional use, or indirectly as no new infrastructure would be extended to the site. The project would not alter the location, distribution, or density of human population in the area in any significant way, or create a demand for additional housing (Source: IX. 1, 3, 5, & 7). Therefore, the proposed project will have no impact related to Population/Housing.

7. Public Services The proposed project consists of the construction of one new single family home which would be served by public and private services. The project would have no measurable effect on existing public services. The Monterey County Water Resources Agency, Monterey County Public Works Department, the Environmental Health Division, and the Carmel Highlands Fire Protection District have reviewed the project. These agencies provided comments on the project, which are incorporated into the project as conditions of approval. None of the County departments / service providers indicated that this project would result in potentially significant impacts as conditioned (Source: IX. 1). Therefore, the proposed project will have no impact to Public Services.

8. Recreation The proposed project would result in the construction of one new single family home and caretaker unit on a vacant lot. The project would not result in an increase in use of existing recreational facilities that would cause substantial physical deterioration. The Carmel Land Use Plan Figure 3 does not show any existing or proposed trail systems on the subject property. The Monterey County Parks Department has reviewed the application and has deemed the project complete without conditions or comments (Source IX. 1 & 3). Therefore the project will have no impact on Recreation.

9. Transportation/Traffic The development of a single-family dwelling and caretaker unit on an existing legal lot of record will not generate a significant increase in traffic movements. The County Department of Public Works has reviewed the project and has recommended a condition requiring payment of the Transportation Agency of Monterey County (TAMC) Regional Development Impact Fee. Payment of the TAMC fee is a standard requirement for new dwelling units. Payment of the fee off-sets cumulative traffic impacts by funding regional road improvement projects. There will be no substantial increase in air traffic movements or locations patterns from the proposed development. Parking exceeds the minimum requirements contained in the zoning ordinance (Source IX. 1 & 17). Therefore, as conditioned the proposed project will have no impact related to Traffic.

10. Utilities/Service Systems The proposed project consists of the construction of a single family dwelling and caretaker unit that would be served by mostly private utilities with the exception of electric which is available to the site from Pacific Gas and Electric. Water will be provided by a private well, permitted as a test well under PLN070033, which has been tested and approved by the Monterey County Environmental Health Division. The project also includes a new septic system and leach fields which has also been reviewed by Environmental Health. The County Department of Public Works and the Water Resources Agency have reviewed the project and find no adverse impacts. Storm water will be controlled and contained on site and allowed to percolate back into the ground. The
amount of solid waste generated by the proposed project, one new single family dwelling, will not significantly impact the area's solid waste facilities which are run by the Monterey Regional Waste Management District. This new single family dwelling and caretaker unit will not cause a significant increase nor exceed the capacity of the utilities and services being provided. (Source IX. 1). Therefore, the proposed project will have no impact to Utilities/Services.

B. DETERMINATION

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☒ I find that although the proposed project could have a significant effect on the environment there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a “potentially significant impact” or “potentially significant unless mitigated” impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Craig W. Spencer
Associate Planner
V. EVALUATION OF ENVIRONMENTAL IMPACTS

1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on project-specific screening analysis).

2) All answers must take into account the whole action involved, including offsite as well as onsite, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).

5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
   a) Earlier Analysis Used. Identify and state where they are available for review.
   b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
   c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a
previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

8) The explanation of each issue should identify:

   a) The significance criteria or threshold, if any, used to evaluate each question; and
   b) The mitigation measure identified, if any, to reduce the impact to less than significance.

Discussion:

Aesthetics

The subject parcel contains a building envelope created by a lot line adjustment (PC6251) that is located along a ridge top overlooking Highway 1 to the west. The subject application would change the location of the building envelope to an area just across the street from its current location and still on a ridge top. Monterey County regulates ridgeline development where any structure is proposed on the crest of a hill that would silhouette against the sky. Views from the property provide a line of sight to public viewing areas including Highway 1 to the north and south of the property, and Point Lobos to the west. Staking and flagging were required for the proposed project to determine visual impacts from the common public viewing areas.

Conclusion:

Aesthetics 1 (a & b) – No Impact

Staking and flagging of the proposed building location and height could not be seen with unaided vision from Highway 1 or Point Lobos due to topography, vegetation, and distance. The staking and flagging were located in the area of the proposed new building envelope location. The new
building envelope is set back slightly further from the west-facing crest of the ridge top than the original building envelope location, lending to a lesser degree of visibility than if the building envelope were not changed. The proposed structure will not be visible from Highway 1, Point Lobos, or other scenic vista areas (Source IX. 7). Therefore, the proposed project will have no impact on designated scenic vistas or substantially damage scenic resources.

Aesthetics 1 (c) – Less Than Significant
The site is located in a mountainous area mostly undisturbed except for a graded dirt road and utilities. Currently, the area contains a dense vegetative cover of coastal scrub habitat with pine trees and redwood trees mixed in along the ridge top. The proposed dwelling will require removal of 20 small Monterey pine trees and approximately 12,000 square feet of Coastal Scrub habitat which will change the appearance of the site at the developed location. The area where the structures are proposed and vegetation removal is required includes a small portion of the site north of Corona Road which is a road that cuts through the site. The remainder of the parcel outside the proposed building envelope would continue to be protected through a conservation easement that will include the area where the building envelope was originally located. Trees will be retained and protected near the developed area minimizing the visual impact of the development when viewed from both on and off-site. The proposed dwelling and caretaker unit are clustered in an area close to the existing road and their development will have minimal impacts to the 84 acre site on the whole (Source IX. 1, 7, & 13).

Aesthetics 1 (d) – Less Than Significant
Construction of a new single family dwelling and caretaker unit will introduce new exterior lighting at the site. The project site is located at a distance and elevated substantially from Highway 1 and Point Lobos making the site indiscernible from these public viewing areas; however, lighting can significantly increase visibility at night. Consistent with Carmel LUP policies, a standard condition of approval will be applied to minimize visibility of lighting and off-site glare by requiring review of lighting plans for appropriate intensity and design so that only the areas intended will be illuminated and off-site glare is fully controlled. In addition, the proposed dwelling and caretaker unit have been designed with earth-toned colors and materials, including stone veneer, light beige stucco, and mission clay tile roofing which are materials that provide little or no reflectivity (Source IX. 1, 3, & 7). Therefore, the proposed project will have a less than significant impact on scenic resource and will not create a new substantial source of glare.
2. AGRICULTURAL AND FOREST RESOURCES

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state’s inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board.

Discussion:

Air Quality

The Monterey Bay Unified Air Pollution Control District (MBUAPCD) prepared the Air Quality Management Plan (AQMP) for the Monterey Bay Region. The AQMP addresses the attainment and maintenance of State and federal ambient air quality standards within the North Central Coast Air Basin (NCCAB). Consistency with the AQMP is an indication of a project’s cumulative adverse impact on regional air quality. It is not an indication of project-specific impacts, which are evaluated according to the Air District’s adopted thresholds of significance.

Conclusion:

Air Quality 3(a, b, e, & f) – No Impact

The development of a single family dwelling and caretaker unit on an existing legal lot of record is not subject to MBUAPCD regulations. Development of an existing residential lot for residential purposes is accommodated in the AQMP. Therefore, the proposed development would not increase population that would exceed the forecast in the AQMP. The establishment of a single family dwelling and caretaker unit at the site will not create or produce objectionable odors. Most potentially significant air quality issues related to construction of single family
homes involve the site grading activities. In accommodating for residential development, the AQMP takes into account the minor impacts of building site grading and construction of a single family dwelling. These are not considered potentially significant unless there are unusual circumstances requiring large areas of site preparation and long-term involvement of heavy equipment (Source: IX. 1 & 6). Therefore, the project will have no impact on implementation of the Air Quality Plan or expose people to substantial pollutants or objectionable odors.

**Air Quality 3 (c & d) – Less Than Significant**

The North Central Coast Air Basin is in non-attainment for the State 8-hour PM$_{10}$ standards. The CEQA Air Quality Guidelines outline a threshold for construction activities with potentially significant impacts for PM$_{10}$ to be 2.2 acres of disturbance per day. As less than 2.2 acres will be disturbed by this project, the grading proposed will not constitute a significant impact. Grading of the project site will result in minor increases in emissions from construction vehicles and dust generation. Best Management practices for construction and grading activities are to wet exposed soil to minimize the potential for dirt to become airborne through wind erosion or vehicle disturbance and to replant and stabilize graded areas as soon as possible. For construction vehicles, adherence to state required idle restrictions and use of properly maintained and tune equipment with diesel particulate matter filters would minimize vehicle exhaust related emissions during construction. The relocating of the building envelope on the property does not change the air quality analysis because, about the same or more grading would be required due to the sloping topography within the existing building envelope. Generally, in the long-term, the primary source of air emissions is vehicular traffic. Vehicle traffic reduction measures are considered on a regional basis through regional planning efforts. The development of a single family dwelling and caretaker unit will not affect the regional traffic planning efforts and will not cause significant increases in traffic congestion in the area. Standard conditions requiring adherence to Best Management Practices will minimize construction related air quality impacts for the project (Source: IX. 1, 6, & 7). Therefore the impacts to Air Quality from construction vehicles and equipment will be less than significant.

Discussion:

Biological Resources

The subject property is over 84 acres in size and supports a variety of vegetation and wildlife. The California Natural Diversity Database (CNDDB) shows the area as potential habitat for Monterey Pine Forest, Central Maritime Chaparral, and Smith's Blue butterfly habitats. Due to the potential for biological impacts, a report from a qualified biologist was prepared for the project pursuant to the Carmel Land Use Plan requirements (CIP 20.146.040.A). A report, prepared by Jud Vandevere, was submitted for the proposed project. The project report identifies impacts to maritime chaparral and coastal sage habitat over about one tenth of an acre for the proposed development. Review of the plans submitted indicate that that area is considerably more and appears to be approximately 12,000 square feet of area or just over a third of an acre. The report identifies that the chaparral community itself is threatened habitat and is considered environmentally sensitive. Within the chaparral community there are individually threatened plants including Hooker's Manzanita and Monterey Ceanothus. This plant community requires fire for propagation. Construction of homes and associated fire prevention has impacted the plant community. There are also twenty Monterey Pine trees ranging in size from 4 to 6 inches in diameter to be removed for the proposed development.

Conclusion:

Biological Resources 4 (c) – No Impact

The building site is located on the crest of a hill in the dry mountainous area behind the Carmel Highlands. There are no wetlands, streams, or other water-related habitats near the building.
envelope or access road (Source IX. 7). **Therefore, the proposed project will have no impact on wetlands or waterways.**

**Biological Resources 4 (d) – No Impact**
The remote and mostly undisturbed nature of the site and surroundings, combined with the chaparral and pine forest, provides habitat and corridors for a wide variety of wildlife. The proposed development will not significantly impact the ability of wildlife to move through or around the site. The house will be located off an existing road and will occupy a small area of the large lot. The remainder of the lot will be protected through the conservation and scenic easement. For future reference, highly exclusive fencing should not be constructed at the site except for around small garden areas. There are no wetlands or waterways on the property so the project will not interfere with migratory fish (Sources IX. 1 & 7). **Therefore, the project will have no impact on migratory fish or other wildlife.**

**Biological Resources 4 (f) – No Impact**
There is an existing building envelope and recorded conservation and scenic easement deed that was established as part of a lot line adjustment project (PC6251). The proposed project would require relocation of the established building envelope and amendment to the conservation and scenic easement deed. The environmental effects of the proposed amendments to the map and easement are discussed herein. Overall, the proposed location appears to be superior to the original location due to fewer impacts from development on slopes and for visual impacts. The remaining topics of discussion would either not be affected or would be substantially the same impacts in either location. The proposed project will be considered by the appropriate authority pursuant to the Zoning Ordinance (Title 20) for the Combined Development Permit and the map amendment and the revisions to the conservation and scenic easement deed will be considered by the Board of Supervisors prior to being recorded at the Monterey County Recorder’s Office. There are no other conservation plans applicable to the site (Source IX. 1, 5, & 13). **Therefore, the project will have no impact on Habitat plans or Conservation Planning.**

**Biological Resources 4 (a, b, & e) – Less Than Significant with Mitigation**
The Carmel Land Use Plan Section 2.3.1 lists dwarf coastal chaparral and Monterey Pine forest as sensitive environments for their habitat wildlife value and watershed protection qualities. Both of these types of habitats exist within the proposed building envelope and will be impacted by the improvements. The same is true for the existing building envelope. In both cases a relatively small area, approximately half an acre, of the over 84 acre parcel could be developed (Source IX. 1, 3, 7, & 9).

*Monterey Pines* are threatened in their natural habitat (CNPS listing); however, the trees proposed for removal are small enough (less than 12 inches in diameter) that they do not require an additional entitlement for their removal (Source: IX. 1, 3, 7, & 9). Approximately 20 small pine trees would be removed for grading and development. In addition, there are several pines located near where development will occur that can be preserved. Pines contribute to the scenic qualities of the site and provide habitat for nesting birds and other animal species. It is unlikely in this case that the small pines provide enough height and foliage to be nesting habitat but if not removed they may grow to a sufficient size for this purpose. Although a permit is not required for
the removal of these small pines, it will be recommended that conditions requiring tree protection for preservation of trees near the development due to the beneficial qualities they provide. Replanting trees is not recommended because of the balance of chaparral and pine forest that is established at the site. It would not be desirable to replace existing chaparral with planted pine trees in this case.

The site where the existing building envelope is located, presents essentially the same foreseeable conflicts with pines and vegetation. Therefore, the relocation of the building envelope is acceptable from a tree preservation perspective. Even though pines will be removed, there are many more pines at the site that will be preserved within the amended conservation and scenic easement providing adequate mitigation inherently (Sources IX. 1 & 7).

*Maritime Chaparral* mixed with pine forest covers most of the over 84 acre site. The chaparral community contains habitat for many animal species and can contain threatened plant species. In this case the chaparral is comprised of manzanita bushes including the threatened Hooker’s Manzanita and Monterey Ceanothus. Here again, the area of proposed development is a small portion of the over 84 acre site. The development will be located adjacent to the existing roadway, so impacts will not divide or create pockets in the habitat. Potential impacts to the habitat were evaluated under the permit that created the building envelope (PC6251) and those impacts were fully mitigated by placing the property outside the envelope in an easement. The existing building envelope contains similar vegetation and the change in the building envelope location will reflect the new area and maintain the easement over the remaining property. Although the impacts are mitigated through the conservation easement, the proposed development will require removal of 7 hooker’s manzanita shrubs. To minimize impacts to Hooker’s Manzanita the applicant has submitted a letter from the biologist for the project indicating that native manzanita plants will be grown at a local nursery using cuttings from existing plants at the site. To ensure no net loss of Hooker’s Manzanita at the site the following Mitigation is suggested:

**Mitigation Measure #1:** The applicant/owner shall consult with a qualified biologist to ensure that cuttings sufficient to ensure that at least 7 locally genetic Hooker’s Manzanita plants can be regenerated for replanting at the site following construction activities prior to any grading or vegetation removal activities at the site. The biologist/owner shall ensure that the at least 7 Hooker’s Manzanita of local genetic stock are replanted at the site following completion of construction activities. The survivability of the replanting shall be monitored.

**Monitoring Action 1A:**

Prior to grading or vegetation removal the applicant/owner shall have a qualified biologist take cuttings of Hooker’s Manzanita at the site for the purpose of generating new health plants of local genetic stock. Prior to issuance of permits, the biologist shall submit a letter to the RMA – Planning Department verifying that cuttings have been obtained and that plants will be grown form these cuttings for planting within the landscape at the subject property.
Monitoring Action 1B:
Prior to final building inspection, the applicant shall demonstrate to the satisfaction of the RMA - Planning Department that at least 7 Hooker’s Manzanita plants of local genetic stock have been planted at the site.

Monitoring Action 1C:
Six months following the replanting of the Hooker’s Manzanita, the applicant/owner shall submit a report from a qualified biologist describing the health and condition of the replanted shrubs. If there is shrub mortality resulting in fewer than 7 Hooker’s Manzanita remaining, the applicant/owner shall have clippings taken from nearby Manzanita and the actions required by this mitigation shall start over until a 1:1 replacement is achieved.

To aid in the preservation of the remaining habitat, fire clearance and landscaping are the main concerns. One hundred (100) feet of vegetation clearance is required for defensible space around the home. Fire clearance will need to be controlled to strike a balance between the need to provide adequate fire clearance for health and safety of residents while not clear-cutting sensitive vegetation beyond the minimum necessary. The Carmel Highlands Fire Department recognizes this need to balance the two objectives and in similar cases has allowed for thinning and removal of dead limbs and vegetation from 30 feet to 100 feet around the dwelling. Mitigation is suggested to create and implement a Fire Hazard Mitigation Plan that achieves this balance and is acceptable to the Fire Department. Within 30 feet of the dwelling a “green vegetation zone” should be maintained. This usually includes landscaping. Landscaping plans will be required as a condition of approval. Pursuant to Mitigation Measure #1, native manzanita plants will be grown at a local nursery using cuttings from existing plants at the site. These plants will then be used in the landscaping at the site. Native species used in landscaping and implementation of erosion control measures will help avoid introduction of invasive species that could threaten the native chaparral community at the site (Source: IX. 1, 4, 5, 7, 9, 13, & 18).

Mitigation Measure #2: Prior to the final decision on the Coastal permits, the owner/applicant shall prepare a Fire Hazard Mitigation Plan that would preserve as much native vegetation as possible within the defensible space required by the fire department. The owner/applicant shall have the plans reviewed and approved by the Carmel Highlands Fire Department representative and the RMA - Planning Department before the hearing is set. The Fire Mitigation Plan shall be incorporated into the permit and fire clearance shall be done in conformance with the plan.

Monitoring Action 2A:
Prior to issuance of building permits the owner/applicant shall incorporate the Fire Hazard Mitigation Plan into the design and enumerate as “Fire Dept. Notes” on plans.

Monitoring Action 2B:
Prior to final inspection the owner/applicant shall schedule a fire department clearance inspection for review and approval of fire clearance around the structure and other appropriate fire conditions.

**Monitoring Action 2C:**
Ongoing annual maintenance to remove dead vegetation within the defensible space as directed by the Carmel Highlands Fire Department shall be required and is the sole responsibility of the owner/occupant.

*As designed and mitigated, the project will have a less than significant impact on sensitive plant and animal species and trees.*

**Discussion:**

**Geology and Soils**

The project site is located on a ridge top in a mountainous area with steep slopes over much of the large lot. These steep slopes combined with loose top soils and proposed grading activities could result in erosion and loss of top soil. All of Monterey County is susceptible to seismic related ground shaking due to the many active faults in the region having the capability to produce earthquakes that can be felt at large distances including the San Andreas Fault. The site contains loose top soils with weathered granite below. The granite is a benefit from a seismic stability standpoint but can provide difficult conditions for septic systems. A geotechnical and geoseismic report and a percolation and groundwater study were prepared for the proposed project by Grice Engineering and Geology Inc., dated January 2008 and March 2009 respectively.
Conclusion:
Geology and Soils a (i, iii, iv), c, & d – No Impact
The geotechnical and geoseismic report did not identify any risks from ground rupture or liquefaction. Conclusions of the report indicated that “It is our opinion that this site is suitable for the proposed development, provided the recommendations [in this report] are followed.” Conformance with recommendations, including footing design suggestions, will be required through Monterey County standard conditions of approval. According to the geotechnical report, the site does not have soils characteristics or other evidence that are indicative of fault ruptures, liquefaction, or landslides (Source: IX. 10). Therefore, there are not impacts resulting from fault ruptures, liquefaction, or landslides.

Geology and Soils a (ii) – Less Than Significant
The Carmel Land Use Plan identifies high geologic hazard areas within 1/8 mile of an active or potentially active fault. The geotechnical report indicates that the nearest known potentially active fault is line is the San Gregorio-Palo Colorado (Sur) Fault, located approximately 3.4 miles to the southwest. This fault is a Type B fault and is not expected to produce earthquakes and ground shaking at the intensity that the Type A San Andreas Fault is capable of. Because the site is not within 1/8 mile of a potentially active fault does not mean that the site is not subject to seismic related ground shaking. As all of Monterey County has the potential for ground shaking at some point in the future, the geotechnical engineer has made recommendations including locating the foundation in undisturbed native soils found at depth or on engineered fill and that the foundation be designed and constructed using the current Building Code standards for seismic zone IV. These recommendations will prevent resonance amplification between soils and the structure and is the standard for construction of habitable structures in Monterey County (Source IX. 3 & 10). Therefore, the proposed project will have a less than significant impact to seismic related ground shaking.

Geology and Soils b – Less Than Significant
Saturated soils and erosion severely increase the risks of ground movement so proper control of drainage and runoff are essential to preventing ground movement. An erosion control plan has been submitted showing measures that will be employed during grading and construction activities. The plans were prepared by civil engineers with Benjamini and Associates. Among other measures, fiber Rolls will be used to trap sediment on site during construction and the site will be reseeded and stabilized following completion of grading. Following construction, runoff from the proposed impervious surfaces will need to be controlled to prevent on-going erosion hazards. The geotechnical report prepared for the project indicates that subsurface drainage may not be used at this site. Therefore, several points of release for the storm water, with adequate dissipation and erosion control measures must be developed. The release points will need to be located away from the proposed leach fields and off of slopes greater than 30%. The Monterey County Water Resources Agency has recommended a standard condition requiring submittal review and approval of a stormwater control plan prior to issuance of permits. In addition, standard building and grading requirements will be imposed on the project including erosion control measures during construction and proper drainage control from newly constructed structures. These measures are required to be shown in construction plans and are inspected by Monterey County building inspectors. The weathered granite soils, combined with proper control
of drainage and current vegetative cover, make it unlikely that there will be a significant loss of top soils or landslides at the site (Source IX. 1 & 10). Therefore, the proposed project will have a less than significant impact to erosion.

**Geology and Soils e – Less Than Significant**
A Percolation and Groundwater study with Septic Recommendations, prepared by Grice Engineer Inc. dated January 2009 and revised March 2009, was submitted for the project. The report states “In general, this study indicates that the soils generally have acceptable rates of percolation suitable for dispersal of septic effluent by leachfield methods. However, the area for septic dispersal is moderately constrained but provides area for primary, secondary and tertiary leachfields.” Percolation testing was conducted and it was found that the soils at the site have moderate to medium slow percolation rates in the range of 10 to 120 minutes per inch Taft Equivalent. Based on the studies and testing the report recommends that a medium to deep depth trench type system be installed to achieve the best function and longevity. Primary leach fields are proposed just west of the proposed building locations. Secondary and Tertiary leach fields are proposed north of the proposed structure locations. All leachfield locations avoid 30% slopes and their installation is being considered in terms of area of disturbance in this study. The proposed septic system and leach field design has been reviewed by the Monterey County Division of Environmental Health has recommended standard conditions of approval that will be carried forward for the project. Based on this information, soils at the site are expected to be suitable for septic system installation and use (Source IX. 1 & 11).

<tr>
<th>7. GREENHOUSE GAS EMISSIONS</th>
<th>Less Than Significant</th>
</tr>
</thead>
<tbody>
<tr>
<td>Would the project:</td>
<td>Potentially Significant Impact</td>
</tr>
<tr>
<td>a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?</td>
<td>☐</td>
</tr>
<tr>
<td>b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?</td>
<td>☐</td>
</tr>
</tbody>
</table>

**Discussion:**
Greenhouse gases such as Carbon Dioxide and Methane contribute to the “ozone” effect that leads to global warming. Generally, development of an existing lot of record for residential purposes is not a significant contributor to the global problem; however, the project will involve the temporary and stationary sources that generate minor amounts of greenhouse gas emissions.

**Conclusion:**
Greenhouse Gas Emissions b – No Impact
Monterey County does not have an adopted plan for the reduction of greenhouse gases. Preparation of such a plan has begun but is not yet applicable. Instead, the project is considered
in terms of the multiple state and federal laws passed regarding this subject. It is difficult to implement the goals of the various legislations on a small project level basis such as this one. Rather climate action plans are being developed and the Office of Planning and Research (OPR) recommends that each jurisdiction establish their own thresholds of significance. Monterey County has not adopted either a climate action plan or thresholds of significance but it can be inferred from other agencies, including the California Air Resources Board (CARB) whose thresholds have been established well in excess of a single family project and the current environmental practices that the development of a new single family dwelling and caretaker unit would not substantially conflict with greenhouse gas reduction planning. GHG sources targeted in such plans generally involve vehicle miles traveled reductions, waste diversions, and technologies such as electric vehicles, and renewable energy sources, not single residential projects.

**Greenhouse Gas Emissions a – Less Than Significant**

The proposed development would generate greenhouse gas emission through removal of trees and vegetation that not only processes Carbon Dioxide and releases Oxygen back into the air but also releases CO₂ once removed and composted or burned. Greenhouse gases would also be created through use of construction equipment, vehicle trips, and stationary operations within the proposed dwellings including furnaces, fireplaces, and hot water heaters. Use of construction equipment is anticipated to be intermittent and limited to site preparation and some construction activities. Pollutant emissions resulting from heavy equipment use during construction are not anticipated to exceed any significance thresholds or significantly contribute to greenhouse gas effects on the environment. The same applies to the minor addition of vehicle traffic associated with construction of a new single family dwelling and caretaker unit.

For the stationary sources, current building codes require new development to use energy efficient furnaces and water heaters to comply with Title 24. The applicant is also encouraged to consider the use of solar panels (preferably roof mounted) to help generate electricity for the proposed dwellings and off-set some additional stationary source impacts.

All of these impacts are anticipated to provide minuscule and nearly immeasurable contributions of greenhouse gases when viewed in connection with the global contributions on a cumulative basis. It is not anticipated that greenhouse gases generated by the proposed project would have a significant impact on the ozone or the environment. Therefore, impacts to greenhouse gases are less than significant.

</tr>
</tbody>
</table>

Discussion:

Hazards and Hazardous Materials

The property is located in a remote area above the residential community of the Carmel Highlands to the west. The site is predominantly covered with Coastal dwarf chaparral consisting of shaggy bark manzanita, ceanothus, and other high fire load chaparral plant species. According to the biological report, this chaparral community typically would burn by natural causes, such as a lightning strike, every forty to eighty years. Many of the plant species within the chaparral community benefit from these regular burns and, in fact, some species need the fire to propagate.
Risks to the proposed structure and residence from fire are high. No other hazards or hazardous materials are anticipated at the site in association with the new single family dwelling and caretaker unit with the exception of a common propane tank that could provide gas to the dwellings. The project application does not include installation of a propane tank at this time.

Conclusion:

Hazards and Hazardous Materials 7 (a-g) – No Impact

The proposal involves residential development where there would be no use of hazardous materials that would constitute a threat of explosion or other significant release that would pose a threat to neighboring properties. The project, given the nature of its proposed use (one single-family residence and caretaker unit), would not involve the transport, use, or disposal of any hazardous materials. There are no known hazards or hazardous materials associated with this project. The proposed residence would not involve stationary operations, create hazardous emissions or handle hazardous materials. The site location and scale have no impact on and adopted emergency response or emergency evacuation plans. The site is not located near an airport or airstrip (Source: IX. 1, 3, 7, & 15). Therefore, the proposed project will have no impact to Hazardous materials or emissions that could expose people working or residing in the area hazardous or unsafe conditions.

Hazards and Hazardous Materials 7 (h) – Less Than Significant

The proposed development has been reviewed by the Carmel Highlands Fire Department and conditions were recommended to reduce risks from fire including emergency water standards (water tanks), fire sprinkler requirements, very high hazard roof construction standards, and clearance for defensible space. These are standard conditions of approval from the fire department and will be included as conditions of approval for the proposed development.

More information was determined to be required to clarify the defensible space requirement due to the sensitive biological nature of the site and surroundings. A Fire Hazard Mitigation Plan (FHMP) is required pursuant to Mitigation Measure #1 as described in Section VI.4. The FHMP must address two zones of fire protection, the first being the “lean and green zone” within an approximately 30 feet radius of the structure and beyond that the 100-foot fuel reduction area. Mitigation Measure #2 requires review and approval of the Fire Hazard Mitigation Plan by the Fire Department to ensure adequate fire protection. A deed notice has been recorded on the subject property, which satisfied a condition of approval from a previous permit (PC6251), stating that the site is within a high fire hazard zone consistent with the requirements of the Carmel Land Use Plan (Source: IX. 1, 4, 7, & 13).

The amended building envelope location will not change the fire hazard circumstances. The structure will be located off the existing roads with other single family dwelling located in the vicinity making this area one that already has land uses that are not compatible with fire. Because there was a deed notice recorded for the property and based on common sense, the owner of the property should already be aware of the risk of fire. By incorporating the Fire Hazard Mitigation Plan and the standard Fire Department recommended conditions the project will have a less than significant risk of loss, injury or death involving wildland fires.

<td>❌</td>
<td></td>
</tr>
<tr>
<td>c) Conflict with any applicable habitat conservation plan or natural community conservation plan?</td>
<td></td>
<td>❌</td>
<td></td>
</tr>
</tbody>
</table>

**Discussion:**

**Land Use and Planning**

The main area of potential conflict with adopted plans and policies is regarding environmentally sensitive habitat. The Carmel Land Use Plan sets forth policies to protect, maintain, and, where possible, enhance environmentally sensitive habitat areas. These policies recommend avoiding development within sensitive habitat except for resource dependant development such as that required for research, maintaining a buffer from sensitive habitat where possible, and appropriate design and conditions to minimize impacts to the long term maintenance of the habitat. The project also involves amending a building envelope location and a recorded conservation and scenic easement deed that were resulting conditions of a previous planning permit (PC6251).

**Conclusion:**

**Land Use and Planning 9 (a) – No Impact**

Development of one new single family dwelling and a caretaker unit is proposed on an existing legal lot of record within an established building envelope. Land Uses in the area are predominantly Watershed Conservation and Residential. Development of the vacant lot for residential purposes will not divide any established community (Source IX. 1, 3, & 7). Therefore, the project will not physically divide an established community.

**Land Use and Planning 9 (b & c) – Less Than Significant**

Proposed development at the site will directly impact sensitive habitat and species. However, the site maintains a zoning that allows for single family dwellings and caretaker units. Through previous permitting activity, in which residential development was the primary foreseeable use of the site, a building envelope was created and the remaining property was placed in a scenic easement. The building envelope was created based on site characteristics such as proximity to the existing road, slopes, views, and vegetation. The applicant now proposes to move the building envelope and construct new residential structures within the revised building envelope. The revision to the building envelope has been considered in terms of resource policies and...
environmental impacts. The proposed building envelope appears to better achieve the goals and policies of the Carmel Land Use Plan by maintaining proximity to the road, clustering the proposed development, avoiding slopes (the proposed envelope has a flatter area than the current building envelope), and reducing visibility. Other resource protection goals such as sensitive habitat and vegetation impacts would be substantially the same under either case.

The over 84 acre site is covered with steep slopes and vegetation and development anywhere on the lot would impact sensitive habitat. The Carmel Land Use Plan requires that impacts to sensitive habitat be minimized to the maximum extent feasible. The caretaker unit is a conditionally allowed use and if it were removed from the plans the impact area could be reduced slightly; however, the development has been situated in a manner that manner where even if the caretaker unit were omitted only a very small area of disturbance would be achieved. Therefore, the clustered design is appropriate and consistent with the uses allowed at the site and the intent of the Carmel Land Use Plan.

When development within sensitive habitat cannot be avoided, conservation and scenic easements are required to preserve and maintain habitat outside the developed areas. A conservation and scenic easement currently exists over the entire parcel with the exception of the existing building envelope. As part of this project, the conservation and scenic easement deed will be amended to exclude the proposed building envelope area and to include the area where the old building envelope existed. Other conditions described in Section VI. 4 including a condition requiring native landscaping will aid in protecting the sensitive habitat and vegetation outside the building envelope.

With the suggested conditions the project complies with the goals and policies of the Carmel Land Use Plan. The appropriate authority will need to make specific findings of consistency with the Local Coastal Program before approving the project. The conservation and scenic easement will remain in keeping with the original intent and effect of the recorded easement (Source IX. 1, 3, 4, 5, 7, 9, 13, & 18). Therefore, there is a less than significant impact regarding conflicts with the Local Coastal Plan and the conservation and scenic easement.

</tbody>
</table>

Conclusion:

(a) Less Than Significant with Mitigation Incorporated

The project will impact sensitive habitat including maritime chaparral and Monterey Pine trees. The impacts have already been mitigated through the previous permit (PC6251) by placing approximately 84 acres in permanent scenic easement. Revisions to the easement will not change this. Conditions are suggested to minimize impacts to sensitive habitat at the site consistent with Local Coastal Program requirements. Mitigation to minimize impacts to sensitive habitat to a less than significant level for fire clearance around the proposed structures is suggested. The project will not substantially impact fish or wildlife or their habitat in a manner that would threaten to eliminate rare or endangered plant or animal species. An archaeological report has been prepared for the subject property and potential impacts to cultural resources, history or prehistory, are unlikely (Source: IX. 1, 3, 5, 7, 9, 13, & 18).

(b) Less Than Significant

The project includes the placement of a single family dwelling and caretaker unit on an existing legal lot of record, created through a Combined Development Permit/Lot Line Adjustment, file number PC6251. Construction of the proposed project will not significantly increase population
in the area, demand on utilities and services, or contribute significantly to traffic congestion. The proposed project has been reviewed and appears to be consistent with the Local Coastal Plan. Construction related impacts are temporary and as conditioned are not considered to be significant. There is one cumulative impact discussed in Section VI. 7 relating to generation of greenhouse gases. The contribution of greenhouse gases from the proposed project are considered to be minuscule and not in conflict with current programs or policies to reduce generation of gases, in main part due to the nature of the project in relation to the global contributors (Source IX. 1). Therefore, the project will have less than significant cumulative impacts.

(c) Less Than Significant
The project includes construction of a single family dwelling and caretaker unit on a vacant lot of record. Construction of the project is not likely to affect humans in any significant manner. The only potential foreseeable impact would be to the residence of the proposed structures form the threat of fire. Construction methods and fire requirements will be implemented in the project to aid in fire protection. It is foreseeable that if a fire were to occur in the vicinity, structures could be evacuated to avoid adverse effects on humans. (Source: Sections IV, VI, and IX. 1).

VIII. FISH AND GAME ENVIRONMENTAL DOCUMENT FEES

Assessment of Fee:

The State Legislature, through the enactment of Senate Bill (SB) 1535, revoked the authority of lead agencies to determine that a project subject to CEQA review had a “de minimis” (minimal) effect on fish and wildlife resources under the jurisdiction of the Department of Fish and Game. Projects that were determined to have a “de minimis” effect were exempt from payment of the filing fees.

SB 1535 has eliminated the provision for a determination of “de minimis” effect by the lead agency; consequently, all land development projects that are subject to environmental review are now subject to the filing fees, unless the Department of Fish and Game determines that the project will have no effect on fish and wildlife resources.

To be considered for determination of “no effect” on fish and wildlife resources, development applicants must submit a form requesting such determination to the Department of Fish and Game. Forms may be obtained by contacting the Department by telephone at (916) 631-0606 or through the Department’s website at www.dfg.ca.gov.
Conclusion: The project will be required to pay the fee.

Evidence: Based on the record as a whole as embodied in the Planning Department files pertaining to PLN080046 and the attached Initial Study / Proposed Mitigated Negative Declaration.

Before the Zoning Administrator in and for the County of Monterey, State of California

In the matter of the application of:
HARTNETT, STEPHEN P. (PLN080046)
RESOLUTION NO. 11-053
Resolution by the Monterey County Hearing Body:
1) Adopting a Mitigated Negative Declaration;
2) Adopting a Resolution of Intent to Approve a Combined Development Permit consisting of: a) Coastal Administrative Permit to allow the construction of a 6,058 square foot single family dwelling with attached 1,167 square foot garage; b) Coastal Development Permit to allow a 990 square foot Caretaker's Unit with 449 square foot garage; c) a Coastal Development Permit to allow development within 100 feet of Environmentally Sensitive Habitat area (ESHA); and d) Design Approval; and
3) Adopting a Mitigation Monitoring and Reporting Plan
[PLN080046, Hartnet, Stephen P., 164 Corona Road, Carmel Area Land Use Plan (APN: 241-221-011-000)]

The Hartnett application (PLN080046) came on for public hearing before the Monterey County Zoning Administrator on December 8, 2011. Having considered all the written and documentary evidence, the administrative record, the staff report, oral testimony, and other evidence presented, the Zoning Administrator finds and decides as follows:

FINDINGS

1. FINDING:
   CONSISTENCY – The Project, as conditioned, is consistent with the applicable plans and policies which designate this area as appropriate for development.

   EVIDENCE: 
   a) During the course of review of this application, the project has been reviewed for consistency with the text, policies, and regulations in:
      - the 1982 Monterey County General Plan;
      - Carmel Land Use Plan;
      - Monterey County Coastal Implementation Plan Part 4;
      - Monterey County Zoning Ordinance (Title 20);
   No conflicts were found to exist. No communications were received during the course of review of the project indicating any inconsistencies with the text, policies, and regulations in these documents.

   b) The property is located at 164 Corona Road, Carmel (Assessor's Parcel Number 241-221-011-000), Carmel Area Land Use Plan. The parcel is zoned "WSC/40 (CZ) and WSC/80 (CZ)" [Watershed and Scenic Conservation/ 40 acres per unit and Scenic Conservation/ 80 acres per unit (Coastal Zone)], which allows for residential development. Therefore, the project is an allowed land use for this site.
c) The proposed project consists of the construction of a 6,058 square foot, two-story single family dwelling with a 1,167 square foot attached garage with a 449 square foot carport in front of the garage, an 850 square foot caretaker's unit with 676 square foot garage, 4,837 square feet of impervious area for a driveway, patio, and walkways, installation of two 5,000 gallon water tanks, installation of a new septic tank and leach fields, and approximately 2,800 cubic yards of grading (2,700 cut/100 fill) and development within 100 feet of Environmentally Sensitive Habitat (ESH). Entitlements include:
- Coastal Administrative Permit to allow the construction of the single family dwelling with a garage;
- Coastal Development Permit to allow a caretaker's unit with a garage;
- Coastal Development Permit to allow development within 100 feet of ESHA; and
- Design Approval.
Pursuant to Section 20.17.060 of the Monterey County Code, the application meets all site development standards required for the above entitlements.

d) The project planner conducted a site inspection on October 6, 2010 to verify that the project on the subject parcel conforms to the plans listed above.

e) ESHA. The project includes application for development within 100 feet of environmentally sensitive habitat areas (ESH). In accordance with the applicable policies of the Carmel Area Land Use Plan and the Monterey County Zoning Ordinance (Title 20/21), a Coastal Development Permit is required and the authority to grant said permit has been met. (See Finding #8).

f) CARETAKER UNIT. The subject project meets the regulations, standards and circumstances for a caretaker unit (See Finding #7).

g) TREE REMOVAL. Approximately 20 small Monterey pine trees would be removed for grading and development (less than 12 inches in diameter), and therefore, do not require an additional entitlement for their removal. These small pines do not contribute to the scenic qualities of the site nor do they provide habitat for nesting birds and other animal species. In addition, there are several pines located near where development will occur that can be preserved. A standard condition of approval requires tree protection measures for trees near the proposed development (Condition #11). Replanting trees is not recommended because, due to the balance of chaparral and pine forest that is established at the site, it would not be desirable to replace existing chaparral with planted pine trees.

h) VIEWSHED. Staking and flagging of the proposed building location and height could not be seen with unaided vision from Highway 1 or Point Lobos due to topography, vegetation, and distance. The staking and flagging were located in the area of the proposed new building envelope location. The new building envelope is set back slightly further from the west-facing crest of the ridge top than the original
building envelope location, lending to a lesser degree of visibility than if the building envelope were not changed. The proposed structure will not be visible from Highway 1, Point Lobos, or other scenic vista areas. Therefore, there are no visual resource issues.

i) **DESIGN APPROVAL.** Pursuant to Chapter 20.44, Design Control Zoning Districts, the project requires design review of structures to make sure they are appropriate to assure protection of the public viewshed, neighborhood character, and assure visual integrity. The proposed dwelling and caretaker unit have been designed with earth-toned colors and materials, including stone veneer, light beige stucco, and mission clay tile roofing which are materials that provide little or no reflectivity. In addition, a standard condition of approval will minimize visibility of lighting and off-site glare by requiring review of lighting plans for appropriate intensity and design so that only the areas intended will be illuminated and off-site glare is fully controlled (Condition #10).

j) The project was reviewed at the Carmel Land Use Advisory Committee (LUAC) on October 10, 2011. The LUAC recommended (5-0) vote to approve the project with no comments.

k) The application, project plans, and related support materials submitted by the project applicant to the Monterey County RMA - Planning Department for the proposed development found in Project File PLN080046.

2. **FINDING:**

**SITE SUITABILITY** – The site is physically suitable for the use proposed.

**EVIDENCE:**

a) The project has been reviewed for site suitability by the following departments and agencies: RMA - Planning Department, Carmel Highlands Fire Protection District, Public Works, Environmental Health Bureau, and Water Resources Agency. There has been no indication from these departments/agencies that the site is not suitable for the proposed development. Conditions recommended have been incorporated.

b) Staff identified potential impacts to aesthetics, biological resources, greenhouse gas emissions, land use/planning, hazards/hazardous materials and geology/soils. Technical reports by outside consultants indicated that there are no physical or environmental constraints that would indicate that the site is not suitable for the use proposed. County staff independently reviewed these reports and concurs with their conclusions. The following reports have been prepared:

c) Staff conducted site inspections on April 9, 2010 and October 6, 2010 to verify that the site is suitable for this use.

d) The application, project plans, and related support materials submitted by the project applicant to the Monterey County RMA - Planning Department for the proposed development found in Project File PLN080046.

3. 1 FINDING: HEALTH AND SAFETY - The establishment, maintenance, or operation of the project applied for will not under the circumstances of this particular case be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood of such proposed use, or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the County.

EVIDENCE: a) The project was reviewed by RMA - Planning Department, Carmel Highlands Fire Protection District, Public Works, Environmental Health Bureau, and Water Resources Agency. The respective departments/agencies have recommended conditions, where appropriate, to ensure that the project will not have an adverse effect on the health, safety, and welfare of persons either residing or working in the neighborhood.

b) Necessary public facilities will be provided from a test well installed and inspected under a previous permit (PLN070033) that will be converted to a permanent well as part of the proposed project. Sewage disposal will be provided by a new septic system. The project will be served by electric power from an existing underground PG&E service.

c) Preceding Findings #1 and #2 and supporting evidence for PLN080046.

4. FINDING: NO VIOLATIONS - The subject property is in compliance with all rules and regulations pertaining to zoning uses, subdivision, and any other applicable provisions of the County’s zoning ordinance. No violations exist on the property.

EVIDENCE: a) Staff reviewed Monterey County RMA - Planning Department and Building Services Department records and is not aware of any violations existing on subject property.

b) Staff conducted a site inspection on April 9, 2010 and October 6, 2010 and researched County records to assess if any violation exists on the subject property.

c) There are no known violations on the subject parcel.

d) Zoning violation abatement costs, if any, have been paid. A condition is included to assure that all zoning abatement costs, if any, have been paid.

e) The application, plans and supporting materials submitted by the project applicant to the Monterey County Planning Department for the proposed development are found in Project File PLN080046.

5. FINDING: CEQA (Mitigated Negative Declaration) - On the basis of the whole record before the Monterey County Zoning Administrator, there is no
substantial evidence that the proposed project as designed, conditioned and mitigated, will have a significant effect on the environment. The Mitigated Negative Declaration reflects the independent judgment and analysis of the County.

EVIDENCE:

a) Public Resources Code Section 21080.d and California Environmental Quality Act (CEQA) Guidelines Section 15064.a.1 require environmental review if there is substantial evidence that the project may have a significant effect on the environment.

b) The Monterey County Planning Department prepared an Initial Study pursuant to CEQA. The Initial Study is on file in the offices of the Planning Department and is hereby incorporated by reference (PLN080046).

c) The Initial Study provides substantial evidence based upon the record as a whole, that the project would not have a significant effect on the environment. Staff accordingly prepared a Mitigated Negative Declaration.

d) All project changes required to avoid significant effects on the environment have been incorporated into the project and/or are made conditions of approval. A Condition Compliance and Mitigation Monitoring and/or Reporting Plan has been prepared in accordance with Monterey County regulations and is designed to ensure compliance during project implementation and is hereby incorporated herein by reference. The applicant must enter into an “Agreement to Implement a Mitigation Monitoring and/or Reporting Plan as a condition of project approval (Condition #6).

e) The Draft Mitigated Negative Declaration ("MND") for PLN080046 was prepared in accordance with CEQA and circulated for public review from July 8, 2011 through August 8, 2011 (SCH#: 2011071023).

f) Issues that were analyzed in the Mitigated Negative Declaration include: aesthetics, forest resources, air quality, biological resources, geology/soils, greenhouse gas emissions, hazards/hazardous materials, and land use/planning.

g) The proposed development will require removal of seven hooker’s manzanita shrubs. To ensure no net loss of Hooker’s Manzanita, a mitigation measure would require the applicant/owner to consult with a qualified biologist to ensure that cuttings sufficient to ensure that at least seven locally genetic Hooker’s Manzanita plants will be regenerated at the site (Condition #16/Mitigation Measure #1). The parcel is located in a very high fire State Responsibility area. To aid in the preservation of remaining habitat, and the protection of the structures, one hundred feet of vegetation clearance is required for defensible space around the structures. Condition #17/Mitigation Measure #2 required the applicant to prepare a Fire Hazard Mitigation Plan that would preserve as much native vegetation as possible within the defensible space required by the fire department (see Finding #9).

h) Evidence that has been received and considered includes: the application, technical studies/reports (see Finding 2/Site Suitability), staff reports that reflect the County’s independent judgment, and
information and testimony presented during public hearings (as applicable). These documents are on file in the RMA-Planning Department (PLN080046) and are hereby incorporated herein by reference.

i) Staff analysis contained in the Initial Study and the record as a whole indicate the project could result in changes to the resources listed in Section 753.5(d) of the Department of Fish and Game (DFG) regulations. All land development projects that are subject to environmental review are subject to a State filing fee plus the County recording fee, unless the Department of Fish and Game determines that the project will have no effect on fish and wildlife resources. The site supports environmentally sensitive habitat. For purposes of the Fish and Game Code, the project will have a significant adverse impact on the fish and wildlife resources upon which the wildlife depends. State Department of Fish and Game reviewed the MND to comment and recommend necessary conditions to protect biological resources in this area. Therefore, the project will be required to pay the State fee plus a fee payable to the Monterey County Clerk/Recorder for processing said fee and posting the Notice of Determination (NOD).

j) No comments from the public were received.

k) The Monterey County Planning Department, located at 168 W. Alisal, 2nd Floor, Salinas, California, 93901, is the custodian of documents and other materials that constitute the record of proceedings upon which the decision to adopt the negative declaration is based.

6. FINDING: PUBLIC ACCESS – The project is in conformance with the public access and recreation policies of the Coastal Act (specifically Chapter 3 of the Coastal Act of 1976, commencing with Section 30200 of the Public Resources Code) and Local Coastal Program, and does not interfere with any form of historic public use or trust rights.

EVIDENCE: a) No access is required as part of the project as no substantial adverse impact on access, either individually or cumulatively, as described in Section 20.146.130 of the Monterey County Coastal Implementation Plan can be demonstrated.

b) The subject property is not described as an area where the Local Coastal Program requires public access (Figure 3 in the Carmel Area Land Use Plan).

c) No evidence or documentation has been submitted or found showing the existence of historic public use or trust rights over this property.

d) The application, plans and supporting materials submitted by the project applicant to the Monterey County Planning Department for the proposed development are found in Project File PLN080046.

e) The project planner conducted a site inspection on April 9, 2010 and October 6, 2010.

7. FINDING: CARETAKER UNIT – The subject project meets the regulations, standards and circumstances for caretaker units in accordance with the applicable goals, policies, and regulations of the applicable area plan.

Stephen P Hartnett - PLN080046
Page 6 of 11
EVIDENCE:  
a) That the establishment of the caretaker unit will not, under the circumstances of the particular application, be detrimental to the health, safety, peace, morals, comfort and general welfare of persons residing or working in the neighborhood or to the general welfare of the County (see Finding 3).
b) All zoning violation abatement costs, if any, have been paid (see Finding 4).
c) The subject property upon which the caretaker unit is to be built is in compliance with all rules and regulations pertaining to zoning uses, subdivisions and any other applicable provisions of this Title. The caretaker unit meets site development standards for a habitable accessory structure with regard to height and setbacks required in the Watershed and Scenic Conservation zoning district.
d) That adequate sewage disposal and water supply facilities are readily available from a test well installed and inspected under a previous permit (PLN070033) and a new septic system, as approved by the Director of Environmental Health (see Finding 3).
e) That the proposed caretaker unit will not adversely impact traffic conditions in the area. The property is located within a small gated community above the Highlands on Corona Road. The owner lives out of state and needs a caretaker to live on site in order to provide security to the main residence.
f) The application, plans and supporting materials submitted by the project applicant to the Monterey County Planning Department for the proposed development are found in Project File PLN080046.
g) Caretaker Units shall not be allowed on parcels less than 40 acres in the Carmel Planning Area and shall not count towards maximum density. The parcel consists of 84 acres and therefore, meeting the required 40 acre minimum in the Carmel Area Land Use Plan.
h) A condition of approval is required for the applicant to record a deed restriction stating that all regulations are met for a caretaker unit (Condition #14).
i) The applicant travels extensively and needs someone to maintain the grounds and provide security to the main structure.

8. FINDING: ESHA – The subject project minimizes impact on environmentally sensitive habitat areas in accordance with the applicable goals and policies of the applicable area plan and zoning codes.

EVIDENCE:  
a) The project includes application for development within 100 feet of environmentally sensitive habitat areas (ESHA). In accordance with the applicable policies of the Carmel Area Land Use Plan and the Monterey County Zoning Ordinance (Title 20/21), a Coastal Development Permit is required and the authority to grant said permit has been met.
b) Pursuant to Section 20.146.040.B.3 of the Coastal Implementation Plan (Part 4), land uses adjacent to locations of environmentally sensitive habitats must be compatible with the long-term maintenance of the resources. New land uses are considered compatible only in a situation
in which the proposal incorporates necessary site planning and design features which protect habitat impacts and which do not set a precedent for continued land development with the potential to degrade the resource. Maritime Chaparral mixed with pine forest covers most of the site. The chaparral is comprised of manzanita bushes including threatened Hooker's Manzanita and Monterey Ceanothus. Potential impacts to the habitat were evaluated under the permit that created the building envelope (PC6251) and those impacts were fully mitigated by placing the property outside the envelope in an easement. The proposed building envelope contains similar vegetation compared to the existing envelope. Although the impacts are mitigated through the conservation easement, the proposed development will require removal of seven hooker's manzanita shrubs. To ensure no net loss of Hooker's Manzanita, a mitigation measure would require the applicant/owner to consult with a qualified biologist to ensure that cuttings sufficient to ensure that at least seven locally genetic Hooker's Manzanita plants will be regenerated at the site (see Condition #16/Mitigation Measure #1).

c) Deed restrictions or dedications of permanent conservation easements covering the habitat and necessary buffer shall be required as conditions of approval for discretionary permits (20.146.040.B.7 CIP). The applicant proposes relocating an approved building envelope by amending a record of survey found in Volume 16 Page 99 of the Monterey County Records. The Record of Survey was filed pursuant to Monterey County permit number PC-6251. PC-6251 required establishment of building envelops for four (4) parcels located off of Corona Road including the subject property (Parcel D) and granting of a conservation and scenic easement over the land outside of the building envelope. The Conservation and Scenic Easement Deed recorded at the Monterey County Recorder's Office, document number 35437 located at Reel 2520 page 335 will also be amended to except the new building envelope location and include the area where the previous envelope was located. Staff supports the request to revise the existing building envelope because it moves the envelope outside of the viewshed, reduces tree removal, and reduces removal of environmentally sensitive habitat.

d) In order for the Board of Supervisors to approve an Amended Conservation and Scenic Easement with a proposed new building envelope, the Board must review an adopted Mitigated Negative Declaration analyzing the new building envelope as a better location for proposed development. Therefore, the Zoning Administrator adopted the Mitigated Negative Declaration and adopted a Resolution of Intent to approve the project. Once the Amended Conservation and Scenic Easement has been approved and recorded, the Zoning Administrator shall approve the project.

e) The project planner conducted a site inspection on April 9, 2010 and October 6, 2010 to verify ESHA locations and potential project impacts to ESHA.

f) The application, plans and supporting materials submitted by the project
applicant to the Monterey County Planning Department for the proposed
development are found in Project File PLN080046.
g) Preceding Findings #2, #3 and #5 and supporting evidence for
PLN080046.

9. FINDING: WILDFIRE PROTECTION STANDARDS IN STATE
RESPONSIBILITY AREAS – The subject project, as conditioned,
will ensure standardized basic emergency access and fire protection
pursuant to Section 4290 of the Public Resource Code.

EVIDENCE: a) The proposed project is within the Monterey County State
Responsibility Area.
b) The parcel is located above the Carmel Highlands at 164 Corona Road,
est of Point Lobos State Park. The site contains over 84 acres between
Gibson Creek to the north and Wildcat Creek to the south. The site is
steep and densely covered with chaparral and can only be accessed from
Highway 1 through the Carmel Highlands on either Corona Road or
Mount Devon Road. Both roads become decomposed granite surface
that meander through the rough terrain with sharp switch-backs. The
existing building envelope at the site is located just south of Corona
Road and is approximately 0.61 acres in size. The new building
envelope is proposed just north of Corona Road and would contain the
same amount of area. Vegetation within the proposed building envelope
includes a mixture of small pine trees and dense chaparral. Adjacent to
the proposed building envelope is a stand of redwood trees.
c) To aid in the preservation of the remaining on-site habitat, fire clearance
and landscaping are the main concerns. One hundred feet of vegetation
clearance is required for defensible space around the home. Fire
clearance will need to be controlled to strike a balance between the need
to provide adequate fire clearance for health and safety of residents
while not clear-cutting sensitive vegetation beyond the minimum
necessary. The Carmel Highlands Fire Protection District recognizes the
need to balance these two objectives and in similar cases has allowed
for thinning and removal of dead limbs and vegetation from 30 feet to
100 feet around dwellings. A mitigation measure would require a Fire
Hazard Mitigation Plan that achieves this balance and is acceptable to
the fire department (Condition #17/Mitigation Measure #2).
d) The Carmel Highlands Fire District has added an additional condition to
ensure all wildfire protection standards are met (Condition #25).

10. FINDING: APPEALABILITY - The decision on this project may be appealed to the
Board of Supervisors and the California Coastal Commission.

EVIDENCE: a) Section 20.86.030 Monterey County Zoning Ordinance (Board of
Supervisors).
b) Section 20.86.080 Monterey County Zoning Ordinance (Coastal
Commission). The project is subject to appeal by/to the California
Coastal Commission because project involves development that is
permitted in the underlying zone as a conditional use such as
environmentally sensitive habitat and a caretakers unit.

Stephen P Hartnett - PLN080046
Page 9 of 11
DECISION

NOW, THEREFORE, based on the above findings and evidence, the Zoning Administrator does hereby:

1. Adopt the Mitigated Negative Declaration;
2. Adopt a Resolution of Intent to Approve Combined Development Permit consisting of: 1) Coastal Administrative Permit to allow the construction of a 6,058 square foot single family dwelling with attached 1,167 square foot garage; 2) Coastal Development Permit to allow an 850 square foot Caretaker's Unit with 676 square foot garage; 3) a Coastal Development Permit to allow development within 100 feet of Environmentally Sensitive Habitat area (ESHA); and 4) Design Approval, in general conformance with the attached sketch and subject to the attached conditions, all being attached hereto and incorporated herein by reference; and
3. Adopt the attached Mitigation Monitoring and Reporting Program.

PASSED AND ADOPTED this 8th day of December, 2011:

[Signature]
Jacqueline R. Onciano, Zoning Administrator

COPY OF THIS DECISION MAILED TO APPLICANT ON DEC 1 2 2011

THIS APPLICATION IS APPEALABLE TO THE BOARD OF SUPERVISORS:

IF ANYONE WISHES TO APPEAL THIS DECISION, AN APPEAL FORM MUST BE COMPLETED AND SUBMITTED TO THE CLERK TO THE BOARD ALONG WITH THE APPROPRIATE FILING FEE ON OR BEFORE DEC 2 2 2011

THIS PROJECT IS LOCATED IN THE COASTAL ZONE AND IS APPEALABLE TO THE COASTAL COMMISSION. UPON RECEIPT OF NOTIFICATION OF THE FINAL LOCAL ACTION NOTICE (FLAN) STATING THE DECISION BY THE FINAL DECISION MAKING BODY, THE COMMISSION ESTABLISHES A 10 WORKING DAY APPEAL PERIOD. AN APPEAL FORM MUST BE FILED WITH THE COASTAL COMMISSION. FOR FURTHER INFORMATION, CONTACT THE COASTAL COMMISSION AT (831) 427-4863 OR AT 725 FRONT STREET, SUITE 300, SANTA CRUZ, CA

This decision, if this is the final administrative decision, is subject to judicial review pursuant to California Code of Civil Procedure Sections 1094.5 and 1094.6. Any Petition for Writ of Mandate must be filed with the Court no later than the 90th day following the date on which this decision becomes final.

NOTES

1. You will need a building permit and must comply with the Monterey County Building Ordinance in every respect.

Additionally, the Zoning Ordinance provides that no building permit shall be issued, nor any use conducted, otherwise than in accordance with the conditions and terms of the permit granted or until ten days after the mailing of notice of the granting of the permit by the appropriate authority, or after granting of the permit by the Board of Supervisors in the event of appeal.

Stephen P Hartnett - PLN080046
Page 10 of 11
Do not start any construction or occupy any building until you have obtained the necessary permits and use clearances from the Monterey County Planning Department and Building Services Department office in Salinas.

2. This permit expires 3 years after the above date of granting thereof unless construction or use is started within this period.
Monterey County Planning Department
Conditions of Approval/Mitigation Monitoring Reporting Plan
PLN080046

1. PD001 - SPECIFIC USES ONLY

Responsible Department: Planning Department

Condition/Mitigation Monitoring Measure:
This permit for a Combined Development Permit consisting of: 1) Coastal Administrative Permit to allow the construction of a 6,058 square foot single family dwelling with attached 1,167 square foot garage; 2) Coastal Development Permit to allow a new 850 square foot Caretaker's Unit with 675 square foot garage; 3) a Coastal Development Permit to allow development within 100 feet of Environmentally Sensitive Habitat area (ESHA); and 4) Design Approval. The property is located at 154 Corona Road, Carmel (Assessor's Parcel Number 241-221-011-000), Carmel Area Land Use Plan, Coastal Zone, was approved in accordance with County ordinances and land use regulations subject to the terms and conditions described in the project file. Neither the uses nor the construction allowed by this permit shall commence unless and until all of the conditions of this permit are met to the satisfaction of the Director of the RMA - Planning Department. Any use or construction not in substantial conformance with the terms and conditions of this permit is a violation of County regulations and may result in modification or revocation of this permit and subsequent legal action. No use or construction other than that specified by this permit is allowed unless additional permits are approved by the appropriate authorities. To the extent that the County has delegated any condition compliance or mitigation monitoring to the Monterey County Water Resources Agency, the Water Resources Agency shall provide all information requested by the County and the County shall bear ultimate responsibility to ensure that conditions and mitigation measures are properly fulfilled.
(RMA - Planning Department)

Compliance or Monitoring Action to be Performed:
The Owner/Applicant shall adhere to conditions and uses specified in the permit on an ongoing basis unless otherwise stated.

2. PD002 - NOTICE PERMIT APPROVAL

Responsible Department: Planning Department

Condition/Mitigation Monitoring Measure:
The applicant shall record a Permit Approval Notice, for Resolution No. 11-053 for Assessor's Parcel Number 241-221-011-000), approved by the Zoning Administrator on December 8, 2011, with the statements, "The permit was granted subject to 33 conditions of approval which run with the land" and "A copy of the permit is on file with the Monterey County RMA - Planning Department."
Proof of recording of this notice shall be furnished to the Director of the RMA - Planning Department prior to issuance of building permits or commencement of the use.
(RMA - Planning Department)

Compliance or Monitoring Action to be Performed:
Prior to the issuance of grading and building permits or commencement of use, the Owner/Applicant shall provide proof of recording of this notice to the RMA - Planning Department.
3. PD003(A) - CULTURAL RESOURCES NEGATIVE ARCHAEOLOGICAL REPORT

Responsible Department: Planning Department

Condition/Mitigation Monitoring Measure: If, during the course of construction, cultural, archaeological, historical or paleontological resources are uncovered at the site (surface or subsurface resources) work shall be halted immediately within 50 meters (165 feet) of the find until a qualified professional archaeologist can evaluate it. The Monterey County RMA - Planning Department and a qualified archaeologist (i.e., an archaeologist registered with the Register of Professional Archaeologists) shall be immediately contacted by the responsible individual present on-site. When contacted, the project planner and the archaeologist shall immediately visit the site to determine the extent of the resources and to develop proper mitigation measures required for recovery. (RMA - Planning Department)

Compliance or Monitoring Action to be Performed: The Owner/Applicant shall adhere to this condition on an on-going basis. Stop work within 50 meters (165 feet) of uncovered resource and contact the Monterey County RMA - Planning Department and a qualified archaeologist immediately if cultural, archaeological, historical or paleontological resources are uncovered. When contacted, the project planner and the archaeologist shall immediately visit the site to determine the extent of the resources and to develop proper mitigation measures required for the discovery.

4. PD032(A) - PERMIT EXPIRATION

Responsible Department: Planning Department

Condition/Mitigation Monitoring Measure: The permit shall be granted for a time period of 3 years, to expire on the Final Decision Date unless use of the property or actual construction has begun within this period. (RMA-Planning Department)

Compliance or Monitoring Action to be Performed: Prior to the expiration date stated in the condition, the Owner/Applicant shall obtain a valid grading or building permit and/or commence the authorized use to the satisfaction of the Director of Planning. Any request for extension must be received by the Planning Department at least 30 days prior to the expiration date.

5. PD005 - FISH & GAME FEE NEG DEC/EIR

Responsible Department: Planning Department

Condition/Mitigation Monitoring Measure: Pursuant to the State Public Resources Code Section 753.5, State Fish and Game Code, and California Code of Regulations, the applicant shall pay a fee, to be collected by the County, within five (5) working days of project approval. This fee shall be paid before the Notice of Determination is filed. If the fee is not paid within five (5) working days, the project shall not be operative, vested or final until the filing fees are paid. (RMA - Planning Department)

Compliance or Monitoring Action to be Performed: Within five (5) working days of project approval, the Owner/Applicant shall submit a check, payable to the County of Monterey, to the Director of the RMA - Planning Department.

If the fee is not paid within five (5) working days, the applicant shall submit a check, payable to the County of Monterey, to the Director of the RMA - Planning Department prior to the recordation of the final/parcel map, the start of use, or the issuance of building permits or grading permits.
6. PD006 - MITIGATION MONITORING

**Responsible Department:** Planning Department

**Condition/Mitigation Monitoring Measure:** The applicant shall enter into an agreement with the County to implement a Mitigation Monitoring and/or Reporting Plan in accordance with Section 21081.6 of the California Public Resources Code and Section 15097 of Title 14 Chapter 3 of the California Code of Regulations. Compliance with the fee schedule adopted by the Board of Supervisors for mitigation monitoring shall be required and payment made to the County of Monterey at the time the property owner submits the signed mitigation monitoring agreement.

(RMA - Planning Department)

**Compliance or Monitoring Action to be Performed:** Within sixty (60) days after project approval or prior to the issuance of building and grading permits, whichever occurs first, the Owner/Applicant shall:

1) Enter into agreement with the County to implement a Mitigation Monitoring Program.

2) Fees shall be submitted at the time the property owner submits the signed mitigation monitoring agreement.

7. PD007 - GRADING WINTER RESTRICTION

**Responsible Department:** Planning Department

**Condition/Mitigation Monitoring Measure:** No land clearing or grading shall occur on the subject parcel between October 15 and April 15 unless authorized by the Director of RMA - Building Services Department. (RMA - Planning Department)

**Compliance or Monitoring Action to be Performed:** The Owner/Applicant, on an on-going basis, shall obtain authorization from the Director of RMA - Building Services Department to conduct land clearing or grading between October 15 and April 15.

8. PD021 - DEED RESTRICTION-FIRE HAZARD

**Responsible Department:** Planning Department

**Condition/Mitigation Monitoring Measure:** Prior to the issuance of a building permit the applicant shall record a deed restriction which states: "The parcel is located in a high fire hazard area and development may be subject to certain restrictions as per section(s) of the Coastal Implementation Plan and per the standards for development of residential property."

(RMA - Planning Department)

**Compliance or Monitoring Action to be Performed:** Prior to the issuance of grading or building permits, the Owner/Applicant shall submit a signed and notarized document to the Director of RMA-Planning Department for review and signature by the County.

Prior to occupancy or commencement of use, the Owner/Applicant shall submit proof of recordation of the document to the Director of the RMA-Planning Department.
9. PD012(D) - LANDSCAPE PLAN & MAINTENANCE (MPWMD-SFD ONLY)

Responsible Department: Planning Department

Condition/Mitigation Monitoring Measure: The site shall be landscaped. Prior to the issuance of building permits, three (3) copies of a landscaping plan shall be submitted to the Director of the RMA - Planning Department. A landscape plan review fee is required for this project. Fees shall be paid at the time of landscape plan submitted. The landscaping plan shall be in sufficient detail to identify the location, species, and size of the proposed landscaping materials and shall include an irrigation plan. The plan shall be accompanied by a nursery or contractor's estimate of the cost of installation of the plan. Before occupancy, landscaping shall be either installed or a certificate of deposit or other form of surety made payable to Monterey County for that cost estimate shall be submitted to the Monterey County RMA - Planning Department. All landscaped areas and fences shall be continuously maintained by the applicant; all plant material shall be continuously maintained in a litter-free, weed-free, healthy, growing condition. (RMA - Planning Department)

Compliance or Monitoring Action to be Performed: Prior to issuance of building permits, the Owner/Applicant/Licensed Landscape Contractor/Licensed Landscape Architect shall submit landscape plans and contractor's estimate to the RMA - Planning Department for review and approval. Landscaping plans shall include the recommendations from the Forest Management Plan or Biological Survey as applicable. All landscape plans shall be signed and stamped by licensed professional under the following statement, "I certify that this landscaping and irrigation plan complies with all Monterey County landscaping requirements including use of native, drought-tolerant, non-invasive species; limited turf; and low-flow, water conserving irrigation fixtures."

Prior to issuance of building permits, the Owner/Applicant/Licensed Landscape Contractor/Licensed Landscape Architect shall submit one (1) set landscape plans of approved by the RMA-Planning Department, a Maximum Applied Water Allowance (MAWA) calculation, and a completed "Residential Water Release Form and Water Permit Application" to the Monterey County Water Resources Agency for review and approval.

Prior to issuance of building permits, the Owner/Applicant/Licensed Landscape Contractor/Licensed Landscape Architect shall submit the RMA-Planning Department approved landscape plans, a Maximum Applied Water Allowance (MAWA) calculation, and a completed "Residential Water Release Form and Water Permit Application" to the Monterey Peninsula Water Management District for review and approval.

Prior to issuance of building permits, the Owner/Applicant/Licensed Landscape Contractor/ shall submit an approved water permit from the MPWMD to the RMA-Building Services Department.

Prior to occupancy, the Owner/Applicant/Licensed Landscape Contractor/Licensed Landscape Architect shall ensure that the landscaping shall be either installed or a certificate of deposit or other form of surety made payable to Monterey County for that cost estimate shall be submitted to the Monterey County RMA - Planning Department.

On an on-going basis, all landscaped areas and fences shall be continuously maintained by the Owner/Applicant; all plant material shall be continuously maintained in a litter-free, weed-free, healthy, growing condition.
10. PD014(A) - LIGHTING-EXTERIOR LIGHTING PLAN

**Responsible Department:** Planning Department

**Condition/Mitigation Monitoring Measure:**
All exterior lighting shall be unobtrusive, down-lit, harmonious with the local area, and constructed or located so that only the intended area is illuminated and off-site glare is fully controlled. The applicant shall submit three (3) copies of an exterior lighting plan which shall indicate the location, type, and wattage of all light fixtures and include catalog sheets for each fixture. The lighting shall comply with the requirements of the California Energy Code set forth in California Code of Regulations Title 24 Part 6. The exterior lighting plan shall be subject to approval by the Director of the RMA - Planning Department, prior to the issuance of building permits.

(RMA - Planning Department)

**Compliance or Monitoring Action to be Performed:**
Prior to the issuance of building permits, the Owner/Applicant shall submit three copies of the lighting plans to the RMA - Planning Department for review and approval. Approved lighting plans shall be incorporated into final building plans.

Prior to occupancy and on an on-going basis, the Owner/Applicant shall ensure that the lighting is installed and maintained in accordance with the approved plan.

11. PD011 - TREE AND ROOT PROTECTION

**Responsible Department:** Planning Department

**Condition/Mitigation Monitoring Measure:**
Trees which are located close to construction site(s) shall be protected from inadvertent damage from construction equipment by fencing off the canopy driplines and/or critical root zones (whichever is greater) with protective materials, wrapping trunks with protective materials, avoiding fill of any type against the base of the trunks and avoiding an increase in soil depth at the feeding zone or drip-line of the retained trees. Said protection, approved by certified arborist, shall be demonstrated prior to issuance of building permits subject to the approval of RMA - Director of Planning. If there is any potential for damage, all work must stop in the area and a report, with mitigation measures, shall be submitted by certified arborist. Should any additional trees not included in this permit be harmed, during grading or construction activities, in such a way where removal is required, the owner/applicant shall obtain required permits.

(RMA - Planning Department)

**Compliance or Monitoring Action to be Performed:**
Prior to issuance of grading and/or building permits, the Owner/Applicant shall submit evidence of tree protection to the RMA - Planning Department for review and approval.

During construction, the Owner/Applicant/Arborist shall submit on-going evidence that tree protection measures are in place through out grading and construction phases. If damage is possible, submit an interim report prepared by a certified arborist.

Prior to final inspection, the Owner/Applicant shall submit photos of the trees on the property to the RMA-Planning Department after construction to document that tree protection has been successful or if follow-up remediation or additional permits are required.
12. PD010 - EROSION CONTROL PLAN

Responsible Department: Planning Department

Condition/Mitigation Monitoring Measure: The approved development shall incorporate the recommendations of the Erosion Control Plan as reviewed by the Director of RMA - Planning and Director of Building Services. All cut and/or fill slopes exposed during the course of construction be covered, seeded, or otherwise treated to control erosion during the course of construction, subject to the approval of the Director of RMA - Planning and RMA - Building Services. The improvement and grading plans shall include an implementation schedule of measures for the prevention and control of erosion, siltation and dust during and immediately following construction and until erosion control planting becomes established. This program shall be approved by the Director of RMA - Planning and Director of RMA - Building Services.

(RMA - Planning Department and RMA - Building Services Department)

Compliance or Monitoring Action to be Performed: Prior to the issuance of grading and building permits, the Owner/Applicant shall submit an Erosion Control Plan to the RMA - Planning Department and the RMA - Building Services Department for review and approval.

The Owner/Applicant, on an on-going basis, shall comply with the recommendations of the Erosion Control Plan during the course of construction until project completion as approved by the Director of RMA - Planning and Director of RMA - Building Services.

13. PD009 - GEOTECHNICAL CERTIFICATION

Responsible Department: Planning Department

Condition/Mitigation Monitoring Measure: Prior to final inspection, the geotechnical consultant shall provide certification that all development has been constructed in accordance with the geotechnical report.

(RMA - Planning Department and Building Services Department)

Compliance or Monitoring Action to be Performed: Prior to final inspection, the Owner/Applicant/Geotechnical Consultant shall submit certification by the geotechnical consultant to the RMA-Building Services Department showing project's compliance with the geotechnical report.
### 14. PD018(B) - DEED RESTRICTION-CARETAKER UNIT (COASTAL)

**Responsible Department:** Planning Department

**Condition/Mitigation Monitoring Measure:**

The applicant shall record a Deed Restriction stating the regulations applicable to a caretaker unit:

* Only 1 (one) caretaker unit per lot shall be allowed.
* The caretaker shall be employed principally on the lot for purposes of care and protection of persons, plants, animals, equipment, or other facilities on-site or on contiguous lots under same ownership.
* The minimum lot size for establishment of a caretaker unit in areas not served by sewers shall be 2 acres. The minimum lot size for establishment of a caretaker unit in the Carmel Planning Area shall be 40 acres.
* Caretaker units shall not be subject to density requirements of the zoning district in which the lot is located, except in North County. In North County, caretaker units shall not be permitted on lots less than 5 acres if located in an area not served by public sewer systems.
* The maximum floor area for a caretaker unit is 850 square feet.
* A minimum of 1 covered off-street parking space shall be provided for the caretaker unit.
* The caretaker unit shall not be separately rented, let or leased from the main residence whether compensation be direct or indirect.
* Subsequent subdivisions which divide a main residence from a caretaker unit shall not be permitted except where lots created meet minimum lot size and density requirements of the existing zoning.
* Caretaker units are not permitted on any lot less than 10 acres where a senior citizen unit exists. Senior citizen units may be converted to a caretaker unit, subject to a Coastal Administrative Permit.

(RMA - Planning Department)

**Compliance or Monitoring Action to be Performed:**

Prior to the issuance of grading or building permits, the Owner/Applicant shall submit the signed and notarized document to the Director of RMA-Planning Department for review and signature by the County.

Prior to occupancy or commencement of use, the Owner/Applicant shall submit proof of recordation of the document to the RMA-Planning Department.

### 15. PD035 - UTILITIES UNDERGROUND

**Responsible Department:** Planning Department

**Condition/Mitigation Monitoring Measure:**

All new utility and distribution lines shall be placed underground.

(RMA - Planning Department; Public Works)

**Compliance or Monitoring Action to be Performed:**

On an on-going basis, the Owner/Applicant shall install and maintain utility and distribution lines underground.
16. MITIGATION MEASURE #1 - REPLANTING MANZANITA

**Responsible Department:** Planning Department

**Condition/Mitigation Monitoring Measure:**
Mitigation Measure #1: The applicant/owner shall consult with a qualified biologist to ensure that cuttings sufficient to ensure that at least 7 locally genetic Hooker's Manzanita plants can be regenerated for replanting at the site following construction activities prior to any grading or vegetation removal activities at the site. The biologist/owner shall ensure that the at least 7 Hooker's Manzanita of local genetic stock are replanted at the site following completion of construction activities. The survivability of the replanting shall be monitored. (RMA Planning Department)

**Compliance or Monitoring Action to be Performed:**

Monitoring Action 1A:
Prior to grading or vegetation removal the applicant/owner shall have a qualified biologist take cuttings of Hooker's Manzanita at the site for the purpose of generating new health plants of local genetic stock. Prior to issuance of permits, the biologist shall submit a letter to the RMA Planning Department verifying that cuttings have been obtained and that plants will be grown from these cuttings for planting within the landscape at the subject property.

Monitoring Action 1B:
Prior to final building inspection, the applicant shall demonstrate to the satisfaction of the RMA Planning Department that at least 7 Hooker's Manzanita plants of local genetic stock have been planted at the site.

Monitoring Action 1C:
Six months following the replanting of the Hooker's Manzanita, the applicant/owner shall submit a report from a qualified biologist describing the health and condition of the replanted shrubs. If there is shrub mortality resulting in fewer than 7 Hooker's Manzanita remaining, the applicant/owner shall have clippings taken from nearby Manzanita and the actions required by this mitigation shall start over until a 1:1 replacement is achieved.

17. MITIGATION MEASURE #2 - FIRE MITIGATION PLAN

**Responsible Department:** Planning Department

**Condition/Mitigation Monitoring Measure:**
Mitigation Measure #2: Prior to the final decision on the Coastal permits, the owner/applicant shall prepare a Fire Hazard Mitigation Plan that would preserve as much native vegetation as possible within the defensible space required by the fire department. The owner/applicant shall have the plans reviewed and approved by the Carmel Highlands Fire Department representative and the RMA - Planning Department before the hearing is set. The Fire Mitigation Plan shall be incorporated into the permit and fire clearance shall be done in conformance with the plan. (RMA Planning Department)

**Compliance or Monitoring Action to be Performed:**

Monitoring Action 2A:
Prior to issuance of building permits the owner/applicant shall incorporate the Fire Hazard Mitigation Plan into the design and enumerate as "Fire Dept. Notes" on plans.

Monitoring Action 2B:
Prior to final inspection the owner/applicant shall schedule a fire department clearance inspection for review and approval of fire clearance around the structure and other appropriate fire conditions.

Monitoring Action 2C:
Ongoing annual maintenance to remove dead vegetation within the defensible space as directed by the Carmel Highlands Fire Department shall be required and is the sole responsibility of the owner/occupant.
18. WR2 - STORMWATER CONTROL

**Responsible Department:** Water Resources Agency

**Condition/Mitigation Monitoring Measure:** The applicant shall provide the Water Resources Agency a drainage plan prepared by a registered civil engineer or architect addressing on-site and off-site impacts. Stormwater runoff from impervious surfaces shall be dispersed at multiple points, away from and below any septic leach fields, over the least steep available slopes, with erosion control at outlets. Drainage improvements shall be constructed in accordance with plans approved by the Water Resources Agency. (Water Resources Agency)

**Compliance or Monitoring Action to be Performed:** Submit 3 copies of the engineered drainage plan to the Water Resources Agency for review and approval. Prior to issuance of any grading or building permits.

19. WR40 - WATER CONSERVATION MEASURES

**Responsible Department:** Water Resources Agency

**Condition/Mitigation Monitoring Measure:** The applicant shall comply with Ordinance No. 3932, or as subsequently amended, of the Monterey County Water Resources Agency pertaining to mandatory water conservation regulations. The regulations for new construction require, but are not limited to:
   a. All toilets shall be ultra-low flush toilets with a maximum tank size or flush capacity of 1.6 gallons, all shower heads shall have a maximum flow capacity of 2.5 gallons per minute, and all hot water faucets that have more than ten feet of pipe between the faucet and the hot water heater serving such faucet shall be equipped with a hot water recirculating system.
   b. Landscape plans shall apply xeriscape principles, including such techniques and materials as native or low water use plants and low precipitation sprinkler heads, bubblers, drip irrigation systems and timing devices. (Water Resources Agency)

**Compliance or Monitoring Action to be Performed:** Compliance to be verified by building inspector at final inspection. Prior to final building inspection/occupancy

20. WR43 - WATER AVAILABILITY CERTIFICATION

**Responsible Department:** Water Resources Agency

**Condition/Mitigation Monitoring Measure:** The applicant shall obtain from the Monterey County Water Resources Agency, proof of water availability on the property, in the form of an approved Monterey Peninsula Water Management District Water Release Form. (Water Resources Agency)

**Compliance or Monitoring Action to be Performed:** Submit the Water Release Form to the Water Resources Agency for review and approval. Prior to issuance of any building permits
21. PW0043 - REGIONAL DEVELOPMENT IMPACT FEE

**Responsible Department:** Public Works Department

**Condition/Mitigation Monitoring Measure:** Prior to issuance of building permits, applicant shall pay the Regional Development Impact Fee (RDIF) pursuant to Monterey Code Chapter 12.90. The fee amount shall be determined based on the parameters adopted in the current fee schedule. (Public Works)

**Compliance or Monitoring Action to be Performed:** Applicant shall pay Monterey County Building Services Department the traffic mitigation fee. Prior to issuance of Building Permits

22. FIRE011 - ADDRESSES FOR BUILDINGS

**Responsible Department:** Fire

**Condition/Mitigation Monitoring Measure:** All buildings shall be issued an address in accordance with Monterey County Ordinance No. 1241. Each occupancy, except accessory buildings, shall have its own permanently posted address. When multiple occupancies exist within a single building, each individual occupancy shall be separately identified by its own address. Letters, numbers and symbols for addresses shall be a minimum of 4-inch height, 1/2-inch stroke, contrasting with the background color of the sign, and shall be Arabic. The sign and numbers shall be reflective and made of a noncombustible material. Address signs shall be placed at each driveway entrance and at each driveway split. Address signs shall be and visible from both directions of travel along the road. In all cases, the address shall be posted at the beginning of construction and shall be maintained thereafter. Address signs along one-way roads shall be visible from both directions of travel. Where multiple addresses are required at a single driveway, they shall be mounted on a single sign. Where a roadway provides access solely to a single commercial occupancy, the address sign shall be placed at the nearest road intersection providing access to that site. Permanent address numbers shall be posted prior to requesting final clearance. Responsible Land Use Department: Carmel Highlands Fire District.

**Compliance or Monitoring Action to be Performed:** Applicant shall incorporate specification into design and enumerate as Fire Dept. Notes on plans. Prior to issuance of building permit. Applicant shall schedule fire dept. clearance inspection Prior to final building inspection

23. FIRE014 - EMERGENCY WATER STANDARDS - FIRE PROTECTION WATER SUPPLY - (SINGLE PARCEL)

**Responsible Department:** Fire

**Condition/Mitigation Monitoring Measure:** For development of structures totaling less than 3,000 square feet on a single parcel, the minimum fire protection water supply shall be 4,900 gallons. For development of structures totaling 3,000 square feet or more on a single parcel, the minimum fire protection water supply shall be 9,800 gallons. For development of structures totaling more than 10,000 square feet on a single parcel, the reviewing authority may require additional fire protection water supply. Other water supply alternatives, including ISO Rural Class 8 mobile water systems, may be permitted by the fire authority to provide for the same practical effect. The quantity of water required by this condition shall be in addition to the domestic demand and shall be permanently and immediately available. Carmel Highlands Fire District.

**Compliance or Monitoring Action to be Performed:** Applicant shall incorporate specification into design and enumerate as Fire Dept. Notes on plans. Prior to issuance of grading and/or building permit. Applicant shall schedule fire dept. clearance inspection Prior to final building inspection
24. FIRE015 - FIRE HYDRANTS/FIRE VALVES

**Responsible Department:** Fire

**Condition/Mitigation Monitoring Measure:** A fire hydrant or fire valve is required. The hydrant or fire valve shall be 18 inches above grade, 8 feet from flammable vegetation, no closer than 4 feet nor further than 12 feet from a roadway, and in a location where fire apparatus using it will not block the roadway. The hydrant serving any building shall be not less than 50 feet and not more than 1000 feet by road from the building it is to serve. Minimum hydrant standards shall include a brass head and valve with at least one 2 1/2 inch National Hose outlet supplied by a minimum 4 inch main and riser. More restrictive hydrant requirements may be applied by the Reviewing Authority. Each hydrant/valve shall be identified with a reflectorized blue marker, with minimum dimensions of 3 inches, located on the driveway address sign, non-combustible post or fire hydrant riser. If used, the post shall be within 3 feet of the hydrant/valve, with the blue marker not less than 3 feet or greater than 5 feet above the ground, visible from the driveway. On paved roads or driveways, reflectorized blue markers shall be permitted to be installed in accordance with the State Fire Marshal's Guidelines for Fire Hydrant Markings Along State Highways and Freeways, May 1988. Carmel Highlands Fire District.

**Compliance or Monitoring Action to be Performed:** Applicant shall incorporate specification into design and enumerate as "Fire Dept. Notes", on plans. Prior to issuance of grading and/or building permit.

Applicant shall schedule fire dept. clearance inspection. Prior to final building inspection.

25. FIRE019 - DEFENSIBLE SPACE REQUIREMENTS - (STANDARD)

**Responsible Department:** Fire

**Condition/Mitigation Monitoring Measure:** Manage combustible vegetation within a minimum of 100 feet of structures (or to the property line). Limb trees 6 feet up from ground. Remove limbs within 10 feet of chimneys. Additional and/or alternate fire protection or firebreaks approved by the fire authority may be required to provide reasonable fire safety. Environmentally sensitive areas may require alternative fire protection, to be determined by Reviewing Authority and the Director of Planning and Building Inspection. Carmel Highlands Fire District.

**Compliance or Monitoring Action to be Performed:** Applicant shall incorporate specification into design and enumerate as "Fire Dept. Notes", on plans. Prior to issuance of grading and/or building permit.

Applicant shall schedule fire dept. clearance inspection. Prior to final building inspection.

26. FIRE021 - FIRE PROTECTION EQUIPMENT & SYSTEMS - FIRE SPRINKLER SYSTEM (STANDARD)

**Responsible Department:** Fire

**Condition/Mitigation Monitoring Measure:** The building(s) and attached garage(s) shall be fully protected with automatic fire sprinkler system(s). Installation shall be in accordance with the applicable NFPA standard. A minimum of four (4) sets of plans for fire sprinkler systems must be submitted by a California licensed C-16 contractor and approved prior to installation. This requirement is not intended to delay issuance of a building permit. A rough sprinkler inspection must be scheduled by the installing contractor and completed prior to requesting a framing inspection. Carmel Highlands Fire District.

**Compliance or Monitoring Action to be Performed:** Applicant shall enumerate as "Fire Dept. Notes", on plans. Prior to issuance of building permit.

Applicant shall schedule fire dept. rough sprinkler inspection. Prior to framing inspection.

Applicant shall schedule fire dept. final sprinkler inspection. Prior to final building inspection.
27. FIRE027 - ROOF CONSTRUCTION - (VERY HIGH HAZARD SEVERITY ZONE)

Responsible Department: Fire

Condition/Mitigation Monitoring Measure: All new structures, and all existing structures receiving new roofing over 50 percent or more of the existing roof surface within a one-year period, shall require a minimum of ICBO Class A roof construction. Carmel Highlands Fire District.

Compliance or Monitoring Action to be Performed: Applicant shall enumerate as "Fire Dept. Notes" on plans. Prior to issuance of building permit.

28. EHSP01 - NEW WATER SYSTEM PERMIT (NON-STANDARD)

Responsible Department: Health Department

Condition/Mitigation Monitoring Measure: Pursuant to Monterey County Code Chapter 15.04, Domestic Water Systems, obtain a new water system permit from the Environmental Health Bureau.

Compliance or Monitoring Action to be Performed: Prior to issuance of grading/building Owner/Applicant shall submit necessary application, reports and testing results to Environmental Health Bureau for review and approval.

29. EHSP02 - WELL PROTECTION ZONE (NON-STANDARD)

Responsible Department: Health Department

Condition/Mitigation Monitoring Measure: Submit a map showing the proposed well protection zone at 164 Corona Rd, Carmel (APN 241-221-011-000) that will serve water to the subject parcel APN 241-221-011-00. The well protection zone shall be identified as "Well Protection Zone", and no residential use or any other development shall take place on the lot, other than those uses associated with the well. The well lot shall meet the requirements of the Water Works Standards.

Compliance or Monitoring Action to be Performed: Prior to issuance of Grading/Building Permit the applicant/owner shall Submit a map showing the proposed well protection zone at 164 Corona Rd, Carmel that will serve water to the subject parcel APN 241-221-011-000. To EHB for review and approval.

30. EHSP03 - FIRE FLOW STANDARDS (NON-STANDARD)

Responsible Department: Health Department

Condition/Mitigation Monitoring Measure: Design the water system improvements to meet fire flow standards as required and approved by the local fire protection agency.

Compliance or Monitoring Action to be Performed: Prior to installing system improvements Applicant/Owner shall Submit plans for the proposed water system improvements to the local fire protection agency for review and approval. Submit a set of signed or wet-stamped water system plans approved by the local fire protection agency to EHB for review and approval.
31. EHSP04 DEED NOTIFICATION & PERCOLATION TESTING REPORT (NON-STANDARD)

Responsible Department: Health Department

Condition/Mitigation Monitoring Measure: A deed notification shall be recorded concurrently with the final/parcel map with the Monterey County Recorder which states: "A soils and percolation report has been prepared for this parcel by Gnic Eng. & Geol., dated January 1, 2009 and is on record at the Environmental Health Bureau, Monterey County, File Number PLN 080046. All proposed development shall be in compliance with this report and the recommendations therein, including the recommendations regarding septic system layout on the site map within report C-1" (Environmental Health)

Compliance or Monitoring Action to be Performed: Prior to issuance of Grading/Building Permit, the Owner/Applicant/Engineer shall submit a draft deed notice for review and approval by the Environmental Health Bureau prior to filing the final map/parcel map. Record the deed notification with the Monterey County Recorder and provide proof to Environmental Health and P&B.

32. PD041 - HEIGHT VERIFICATION

Responsible Department: Planning Department

Condition/Mitigation Monitoring Measure: The applicant shall have a benchmark placed upon the property and identify the benchmark on the building plans. The benchmark shall remain visible on-site until final building inspection. The applicant shall provide evidence from a licensed civil engineer or surveyor to the Director of the RMA - Building Services Department for review and approval, that the height of the structure(s) from the benchmark is consistent with what was approved on the building permit associated with this project. (RMA - Planning Department and Building Services Department)

Compliance or Monitoring Action to be Performed: Prior to the issuance of grading or building permits, the Owner/Applicant shall have a benchmark placed upon the property and identify the benchmark on the building plans. The benchmark shall remain visible onsite until final building inspection.

Prior to the foundation pre-pour inspection, the Owner/Applicant shall provide evidence from a licensed civil engineer or surveyor, to the Director of the RMA - Building Services Department for review and approval, that the height of first finished floor from the benchmark is consistent with what was approved on the building permit.

Prior to the final inspection, the Owner/Applicant/Engineer shall provide evidence from a licensed civil engineer or surveyor, to the Director of the RMA - Building Services Department for review and approval, that the height of the structure(s) from the benchmark is consistent with what was approved on the building permit.
33. PDSP001 - Easement to Relocate building envelope

Responsible Department: Planning Department

Condition/Mitigation
Monitoring Measure: The applicant shall obtain Board of Supervisors approval of an amendment to the recorded conservation easement (Conservation and Scenic Easement Deed recorded at the Monterey County Recorder's Office, Document Number 35437 located at Reel 2520 page 335). The amended easement shall be put into Conservation and Scenic Easement all portions of the property except where the revised building envelope exists. The easement shall be development in consultation with certified professionals. An easement deed shall be submitted to, reviewed and approved by, the Director of RMA - Planning Department prior to issuance of grading and building permits. (RMA - Planning Department)

Compliance or Monitoring
Action to be Performed: This Coastal Development Permit shall not take effect unless the Board of Supervisors approves the amended easement. Prior to the issuance of grading and building permits, the Owner/Applicant/Certified Professional shall submit the conservation and scenic easement deed and corresponding map, showing the exact location of the easement on the property along with the metes and bounds description of the building envelope developed in consultation with a certified professional, to the RMA Planning Department for review and approval.

Prior to the issuance of grading and building permits, the Owner/Applicant shall record the amended conservation and scenic easement. Submit a copy of the recorded deed and map to the RMA Planning Department.

GRANT OF SCENIC AND CONSERVATION EASEMENT
(Parcel D)

THIS DEED made this 20th day of February, 1990, by and between HIGHLAND PARTNERS, a Hawaii limited partnership, as "Grantor", and the COUNTY OF MONTEREY, a political subdivision of the State of California, as "Grantee";

WITNESSETH:

WHEREAS, the said Grantor is the owner of the fee simple title and estate in and to that certain real property (hereinafter the "Property"), situated in Monterey County, California, and more particularly described in Exhibit "A", attached hereto and incorporated by reference herein; and

WHEREAS, the Property is currently in a substantially undisturbed natural and open state, has significant and unique natural scenic beauty; and

WHEREAS, Grantor and Grantee desire to preserve and conserve for the public benefit the great natural scenic beauty and existing openness, natural condition and present state of use of the Property of Grantor; and

-1-
WHEREAS, the California Coastal Act of 1976 (hereinafter referred to as the "Act"), requires that any coastal development permit approved by the County of Monterey must be consistent with the provisions of the certified Local Coastal Program (hereinafter referred to as the "LCP"); and

WHEREAS, pursuant to the Act and the LCP, Grantor applied to the County of Monterey for a permit to undertake development as defined in the LCP; and

WHEREAS, a coastal development permit (Permit No. PC-6251) was granted on July 11, 1989, by the County in accordance with the provision of the Staff Recommendation and Findings, attached hereto as Exhibit "B", and hereby incorporated by reference, subject to the following condition:

13. That a "Environmentally Sensitive Habitat" easement and a concurrent "Scenic Easement" deed for slopes over 30% be granted to the County covering that portion of each of the newly reconfigured parcels not involved with the currently proposed development. This "Environmentally Sensitive Habitat" easement and "Scenic Easement" deed shall be submitted to and approved by the Director of Planning and Building Inspection. (Contact the Planning and Building Inspection Department).

; and

WHEREAS, the County of Monterey, acting on behalf of the People of the State of California and pursuant to the Act, and in accordance with the Findings contained in Resolution No. 89-413, attached hereto as Exhibit "C", and hereby
incorporated by reference, granted the Permit to the Grantor upon the condition (hereinafter the "Condition") requiring, inter alia, that the Grantor record a scenic and conservation easement over a portion of the Property as described in Exhibit "D", attached hereto and incorporated by reference, and agree to restrict development on and use of the property so as to preserve the open space, scenic and/or natural resource values present on the Property, and so as to prevent the adverse direct and cumulative effects on coastal resources and public access to the coast which could occur if the Property were not restricted in accordance with this easement; and

WHEREAS, the County has placed the Condition on the Permit because a finding must be made under the law that the proposed development is in conformity with the provisions of the certified LCP and that in the absence of the protections provided by the Condition, said finding could not be made; and

WHEREAS, Grantor has elected to comply with the Condition and execute this easement so as to enable Grantor to undertake the development authorized by the Permit; and

WHEREAS, it is intended that this easement is irrevocable and shall constitute enforceable restrictions within the meaning of Article XIII, Section 8, of the California Constitution, and that said easement shall thereby qualify as an enforceable restriction under the provisions of the California Revenue and Taxation Code, Section 402.1; and

WHEREAS, Grantor is willing to grant to the County of
Monterey the scenic use as hereinafter expressed of the said land, and thereby protect the present scenic beauty and existing openness by the restricted use and enjoyment of said Property by the Grantor through the imposition of the conditions hereinafter expressed.

GRANT

NOW, THEREFORE, for and in consideration of the premises, Grantor does hereby grant and convey to the County of Monterey an estate, interest, and Scenic and Conservation Easement in said real property of Grantor of the nature and character and to the extent hereinafter expressed, which estate, interest, and easement will result from the restrictions hereby imposed upon the use of said Property by said Grantor, and to that end and for the purposes of accomplishing the intent of the parties hereto, said Grantor convenants on behalf of itself, its heirs, successors, and assigns, with the said Grantee, its successors and assigns, to do and refrain from doing severally and collectively upon the Grantor's said Property the various acts hereinafter mentioned, subject to the rights reserved by Grantor herein.

TERMS AND CONDITIONS

A. LAND SUBJECT TO EASEMENT. The portion of the Property of Grantor to which the provisions of this instrument apply (hereinafter referred to as the "Scenic and Conservation Easement Area"), is situated in the County of Monterey, State of California, and is particularly described in Exhibit "D".
attached hereto, and made a part hereof, and is shown on the site plan attached as Exhibit "E" hereto, and made a part hereof. The within Grant conveys no rights in the portions of Grantor's Property not within the Scenic and Conservation Easement Area, nor does it contain any covenants or limitations affecting the same.

B. **RESTRICTIONS OF USE.** The restrictions hereby imposed upon the use of the Scenic and Conservation Easement Area of the property of Grantor and the acts which said Grantor shall refrain from doing upon said Scenic and Conservation Easement Area in connection herewith are, and shall be, as follows:

1. That no structures will be placed or erected upon said Scenic and Conservation Easement Area, except as specifically described or permitted under the Permit or under the rights reserved herein.

2. That no advertising of any kind or nature shall be located on or within the Scenic and Conservation Easement Area, except as specifically described or permitted under the Permit or under the rights reserved herein.

3. That the Grantor shall not plant nor permit to be planted any vegetation upon the Scenic and Conservation Easement Area, except as specifically described or permitted under the Permit or under the rights reserved herein.

4. That, except for the maintenance of private roads or public or private pedestrian or equestrian trails, the
general topography of the Scenic and Conservation Easement Area landscape shall be maintained in its present condition and no excavation or topographic changes shall be made, except as specifically described or permitted under the Permit or under the rights reserved herein.

5. That no use of said Scenic and Conservation Easement Area which will or does materially alter the landscape or other attractive scenic features of said land other than those specified above shall be done or suffered, except as specifically described or permitted under the Permit or under the rights reserved herein.

C. EXCEPTION AND RESERVATION OF RIGHTS. Subject to the ordinances of Grantee requiring permits and regulating the use of land, Grantor for himself, his successors and assigns, excepts and reserves from the foregoing grant and covenants, restrictions, and limitations, the following rights, which are consistent with Grantor's intentions and with this grant of easement, though not an exhaustive recital of consistent use and practices:

1. The right to maintain, repair and improve all existing private roads, bridges, trails and structures upon the Scenic and Conservation Easement Area. Such reserved right includes the following incidental rights:

   a. The right to replace and/or relocate such private roads, bridges, trails and structures in the event of destruction thereof, or as required by the Carmel Highlands
Fire Protection District or the Monterey County Fire Warden, provided that if Grantor wishes to relocate such improvements, the relocation shall be subject to Monterey County's permit requirements and Grantor's compliance with the applicable provisions of federal, state and local law.

2. The right to install and construct utility and other service facilities, including power, gas, heat, water, sanitary water treatment, telephone, television and other telecommunication conduits, lines, pumps, storage tanks, and associated facilities, subject to Monterey County's permit requirements and Grantor's compliance with the applicable provisions of federal, state and local laws. Except as specifically described or permitted by the Permit, all utilities and facilities that are installed or constructed after the date of this Grant of Scenic and Conservation Easement has been executed shall be placed underground to the extent they enter upon or over the Scenic and Conservation Easement Area, and upon completion of installation and construction thereof the surface of said Scenic and Conservation Easement Area shall be returned to its natural state as it existed prior to the commencement of such installation or construction. Such reserved right includes the following incidental rights:

a. The right to maintain and repair such utilities and service facilities; and

b. The right to replace or relocate such
utilities and facilities in the event of destruction thereof, provided that if Grantor wishes to relocate such utilities and facilities, the relocation shall be subject to Monterey County’s permit requirements and Grantor’s compliance with the applicable provisions of federal, state and local law.

3. The right to enter upon and use the Scenic and Conservation Easement Area for passive recreational purposes (such as hiking, picnicing, and nature observation), provided no structures, including signs or picnic tables, are erected and no new trails are established thereon, and provided further that this right is exercised in a manner consistent with the Conservation Easement Area as scenic open space and natural habitat.

4. The right to enter upon the Scenic and Conservation Easement Area as necessary in order to inspect the Scenic and Conservation Easement Area and to prevent use of the Scenic and Conservation Easement Area in a manner inconsistent with public safety needs, and the need to protect natural resource areas from overuse, as prescribed in Public Resources Code Sections 30210 and 30212.

5. The right to construct, erect and install fencing, in manner consistent with the scenic open space and natural habitat character of the area. Such reserved right includes the following incidental rights:

a. The right to repair and maintain such fencing; and
b. The right to replace and relocate said fencing in the event of destruction thereof, provided that if Grantor wishes to relocate such fencing, the relocation shall be subject to the County's permit requirements and Grantor's compliance with all applicable provisions of federal, state and local law.

6. The right to enter upon the Scenic and Conservation Easement Area in order to gather fallen or dead wood therefrom.

7. The use and occupancy of said Scenic and Conservation Easement Area not inconsistent with the conditions and restrictions herein imposed.

D. BENEFIT AND BURDEN. This grant of easement shall run with and burden the Property, and all obligations, terms, conditions, and restrictions hereby imposed shall be deemed to be covenants and restrictions running with the land and shall be effective limitations of the use of the Property from the date of recordation of this document and shall bind the Grantor and all of its successors and assigns. This grant shall benefit the County of Monterey and its successors and assigns forever.

E. RIGHT OF ENTRY. The Grantee or its agent may enter onto the Property to ascertain whether use restrictions set forth above are being observed at times reasonably acceptable to the Grantor. The public may enter onto the Property only for duly authorized and permitted scientific research purposes at times reasonably acceptable to the Grantor,
or pursuant to the terms, conditions, limitations and restrictions of such public access easement over a portion of the Property as Grantor shall make to the County of Monterey, if any, in order to fulfill a condition of the Permit.

F. **ENFORCEMENT.** Any act or any conveyance, contract, or authorization whether written or oral by the Grantor which uses or would cause to be used or would permit use of the Property contrary to the terms of this easement will be deemed a breach hereof. The Grantee may bring any action in court necessary to enforce this grant of easement, including, but not limited to, injunction to terminate a breaching activity and to force the restoration of all damage done by such activity, or an action to enforce the terms and provisions hereof by specific performance. It is understood and agreed that the Grantee may pursue any appropriate legal and equitable remedies. The Grantee shall have sole discretion to determine under what circumstances it shall bring an action in law or equity to enforce the terms and conditions of this grant of easement. Any forbearance on the part of the Grantee to enforce the terms and provisions hereof in the event of a breach shall not be deemed a waiver of Grantee's rights regarding any subsequent breach.

G. **MAINTENANCE.** The Grantee shall not be obligated by this grant of easement to maintain, improve, or otherwise expend any funds in connection with the Property or any interest or easement created by this grant of easement. All costs and
expenses for such maintenance, improvement, use, or possession shall be borne by the Grantor, except for costs incurred by Grantee for monitoring compliance with the terms of this grant of easement, or for costs incurred in connection with any public access easement which Grantor shall dedicate to Grantee in order to fulfill a condition of the Permit.

H. **LIABILITY AND INDEMNIFICATION.** This conveyance is made and accepted upon the express condition that the Grantee, its agencies, departments, officers, agents, and employees are to be free from all liability and claim for damage by reason of any injury to any person or persons, including Grantor, or property of any kind whatsoever and to whomsoever belonging, including Grantor, from any cause or causes whatsoever, except matters arising out of the sole negligence of the Grantee, while in, upon, or in any way connected with the Property, Grantor hereby convenanting and agreeing to indemnify and hold harmless the Grantee, its agencies, departments, officers, agents, and employees from all liability, loss, cost, and obligations on account of or arising out of such injuries or losses however occurring. The Grantee shall not, as a result of this grant of easement, have any right of control over, nor duties and responsibilities with respect to the Property which would subject the Grantee to any liability occurring upon the land by virtue of the fact that the right of Grantee to enter the land is strictly limited to preventing uses inconsistent with the interest granted and does not include the right to

-11-
enter the land for the purposes of correcting any dangerous conditions defined by California Government Code Section 830.

I. **SUCCESSORS AND ASSIGNS.** The terms, covenants, conditions, exceptions, obligations, and reservations contained in this conveyance shall be binding upon and inure to the benefit of the successors and assigns of both the Grantor and the Grantee, whether voluntary or involuntary.

J. **CONSTRUCTION OF VALIDITY.** If any provision of this Scenic and Conservation Easement is held to be invalid or for any reason becomes unenforceable, no other provision shall be thereby affected or impaired.

K. **PUBLIC ACCESS NOT AUTHORIZED.** This Grant of Scenic and Conservation Easement does not authorize or permit, nor shall it be construed as authorizing or permitting access on or the use of Property, except as specifically set forth in paragraph E, above.

IN WITNESS WHEREOF, Grantor and Grantee have executed this Grant of Scenic and Conservation Easement on the dates and at the places set forth immediately below.
Executed this 20th day of February, 1990, at Monterey, California.

EXHIBIT A

BUILDING ENVELOPE DESCRIPTION

A building envelope over a portion of real property described by Quitclaim Deed from Sandra Hartnett to Stephen P. Hartnett, recorded July 10, 2002, as Document No. 2002064197, records of the County of Monterey, State of California, said real property also being Lot “D” on that certain 85.27 acre parcel of land shown and so designated on that Record of Survey map entitled, “Lot Line Adjustment in a Portion of Sections 25 and 36, T.16 S., R.1 W., M.D.B.& M.”, filed for record April 5, 1990, in Volume 16 of Surveys at Page 99, said building envelope being more particularly described as follows:

BEGINNING AT Reference Point “G”, as said point is shown and so designated on said Volume 16 of Surveys at Page 99, marking the centerline of a 60 foot right-of-way designated on said map as “Parcel A”; thence from said Point “G” and along said centerline, North 26°08’00” West, 152.34 feet; thence along a tangent curve to the left having a radius of 100 feet, through a central angle of 40°26’15”, an arc distance of 70.58 feet to the TRUE POINT OF BEGINNING; thence leaving said centerline

1. North 25°01’58” East, 42.49 feet; thence

2. North 31°31’19” West, 138.29 feet; thence

3. North 60°01’34” West, 109.82 feet; thence

4. South 66°57’47” West, 83.29 feet; thence

5. South 13°06’51” East, 147.36 feet; thence

6. South 23°02’01” East, 76.67 feet to the centerline of said 60 foot right-of-way; thence southerly and easterly

7. Along a non-tangent curve to the left having a radius of 45.00 feet, through a central angle of 144°32’00” (the long chord of which bears South 72°16’00” East, 85.72 feet), an arc distance of 113.52 feet; thence

8. North 35°28’00” East, 34.14 feet; thence

9. Along a tangent curve to the right, having a radius of 100.00 feet, through a central angle of 77°57’45”, an arc distance of 136.07 feet to the TRUE POINT OF BEGINNING.
EXCEPTING THEREFROM that portion lying within said 60-foot right-of-way.

Containing 0.76 Acres, more or less.

END OF DESCRIPTION
