Subject: Re: request for info

Hello Fred,

Thank You for your response, we are formally requesting Monterey County ambulance data for the past 5 years to include total number of ambulance requests and the total number transports. As we continue collating data, I'm sure we will have more questions about demographics and other influences on the ambulance transport delivery system.

I am at fire rescue Med in Henderson. AMR gave a presentation pledging partnerships and collaboration with fire to improve patient care and transportation. Very interesting discussion.

Thank You again

Scott Houchin
EMS Officer Salinas Fire Department

Hi Scott. Sorry it took me so long to respond to the message you left last week. I've been off for a few days. Regarding your request, we're in the early stages of formalizing our processes for when stakeholders in the system ask for information. We're doing this because we're getting ready to head into an RFP process and we want to be able to track requests for information that we get, and our responses to those requests. If you could send me your request in writing, I'll start the process on our end to see what we have in the way of documentation. Thanks for your patience as we "ramp up" these processes.

Also, glad you felt positive about the data meeting. I did too. I thought Brad did a great job of showcasing the system. Thanks for your involvement as well.

Fred
