

illness centered

person centered

PERSON CENTERED	ILLNESS CENTERED
The relationship is the foundation	The diagnosis is the foundation
Begin with welcoming – outreach and engagement	Begin with illness assessment
Services are based on personal suffering and help needed	Services are based on diagnosis and treatment needed
Services work towards quality of life goals	Services work towards illness reduction goals
Treatment and rehabilitation are goal driven	Treatment is symptom driven and rehabilitation is disability driven
Personal recovery is central from beginning to end	Recovery from the illness sometimes results after the illness and then the disability are taken care of
Track personal progress towards recovery	Track illness progress towards symptom reduction and cure
Use techniques that promote personal growth and self responsibility	Use techniques that promote illness control and reduction of risk of damage from the illness
Services end when the person manages their own life and attains meaningful roles	Services end when the illness is cured
The relationship may change and grow throughout and continue even after services end	The relationship only exists to treat the illness and must be carefully restricted throughout keeping it professional
