Policy

Family members and/or significant others will be offered an opportunity to actively participate in determining the personal milestones to be used in rehabilitation services development for all adult clients who are receiving services through the Behavioral Health Division Adult Services.

Procedure

1. At time of intake each adult client will be informed of our policy to include family and/or significant others in determining personal milestones to be used in rehabilitation services development. In addition, each adult client will be asked to sign a release of information form authorizing Behavioral Health Division communication with the family around services delivery.
2. If the client refuses he/she will again be asked for their consent before the development of each new case management service plan. Client responses will be appropriately documented in the client file.
