Vandervort Backhoe Service	894693/ Type A	(831) 626-8111			x	

According to the State Contractors License Boards, Class A, C-36 and C-42 licenses may install septic systems. A licensed General Building Contractor, Class B, may install a septic system when that contractor is working on at least 2 other unrelated trades at the same building site. Anyone installing or repairing a septic system must be a licensee or an employee of the company or individual possessing the appropriate license. Qualified professional means an individual licensed or certified by a State of California agency to design, install, and/or maintain OWTS and to practice as professionals for other associated reports, as allowed under their license or registration. Qualified professionals must obtain an annual registration from the Health Department.
