Risk Assessment: Probation utilizes the ORAS (Ohio Risk Assessment System) to calculate an individual’s risk to re-offend. Effective probation supervision utilizing evidence based practices indicate that those with a score of moderate to high are most likely to benefit from rehabilitative services. Supervision correlates with risk; those that are at a higher risk to reoffend are monitored more closely.
As of 12/31/2019, 1170(h) sentenced inmates represent 16% of the total ADP and 47% of the total sentenced population.

Note: This is not a reflection of the number of individuals eligible for pretrial release. The number of Non-Sentenced inmates reflects everyone in custody without a release date, including parole and probation violators.
